For Songs having this indication, you can enjoy playing Styles along with them using Smart Chord. Try using Smart Chord, which lets you play back Styles with only one finger.

· No scores are provided for the demo songs (Song no. 001 ~ 003).

· Some sections of the scores provided may differ from the original versions.

· In some cases the score time signature and metronome timing used may differ, but this has been done to make practice as easy as possible.

· ∇ markings on the score indicate Phrase Repeat function divisions, and (S**) markings are Keys to Success step numbers.

· On-bass chord markings such as (onC) shown on the scores do not appear on the instrument's display.

· Due to display limitations, " ♯ " and " ♭ " notes may not appear exactly the same as they do on the score.

· In sections other than "Learn to Play," songs have an additional finishing step in which you will practice all the way thorough the Lesson Song you have selected.

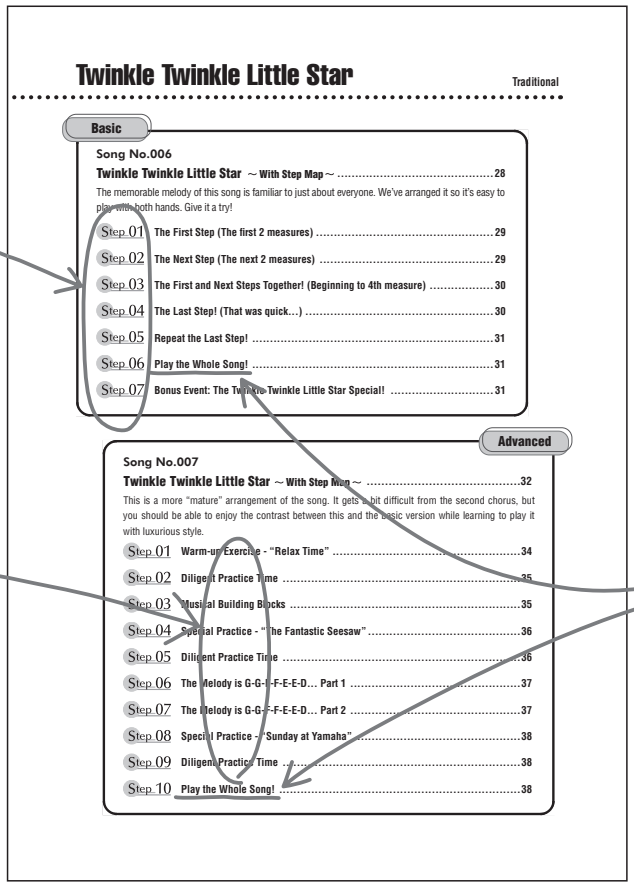
Learn to Play

Welcome to “Learn to Play”!
If you’ve ever wished you could play your favorite songs on the piano, “Learn to Play” will make learning how easy and enjoyable. “Basic” and “Advanced” sections are provided for each song. When you find a song you want to learn, refer to the Master Guide below and get started right away! You’ll have fun mastering each song step by step.

♪Learn to Play Master Guide

Steps
Individual steps make it easy to learn and understand the song’s most important points.

Step Titles
The step titles give you an idea of what each step is all about, and may even provide hints for effectively mastering the steps.



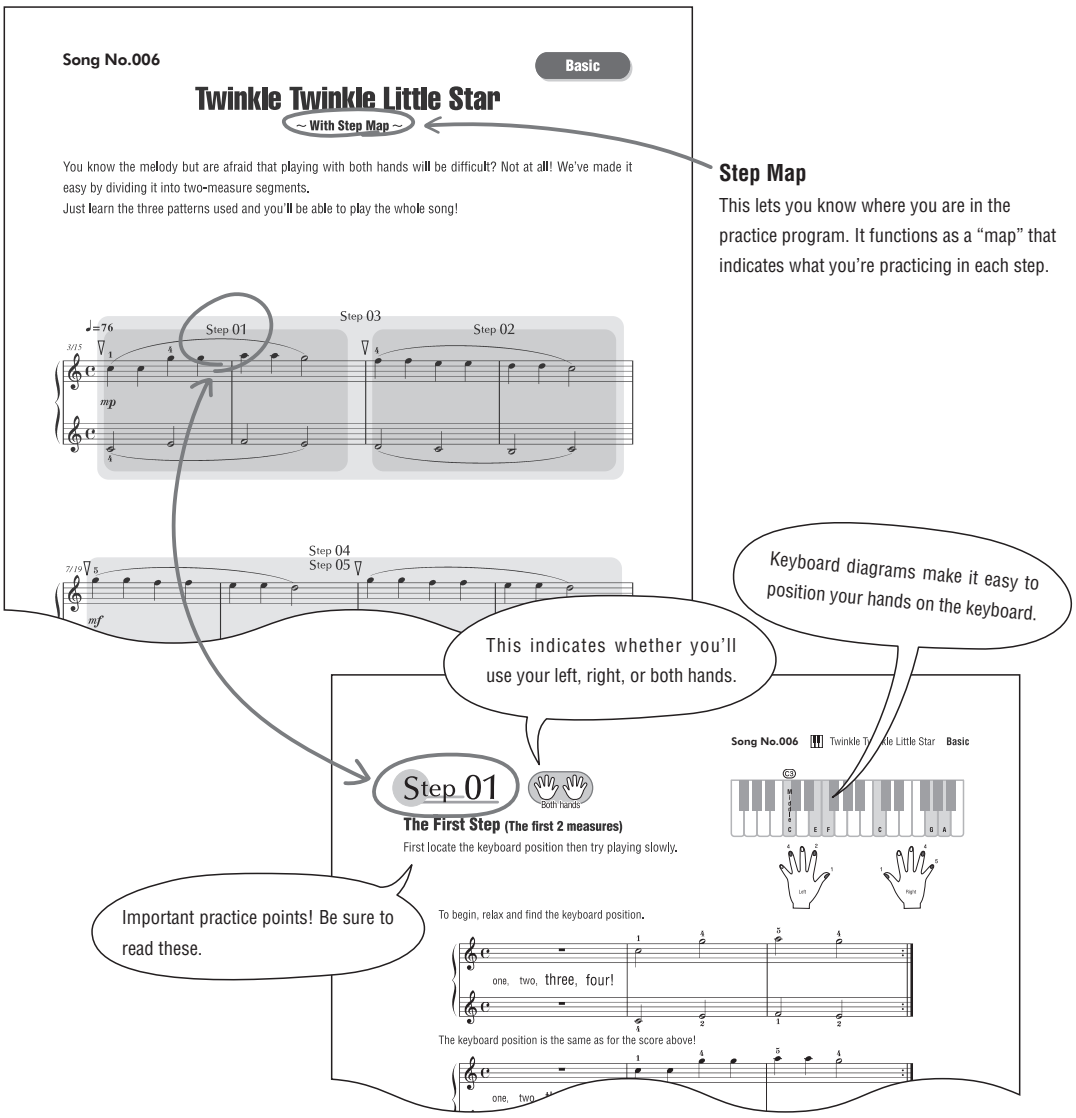
All songs have a finishing step in which you can practice playing all the way through the selected lesson song.

When you complete all the steps given for the selected song, three stars will appear on the instrument’s LCD display. Try to get those three stars!

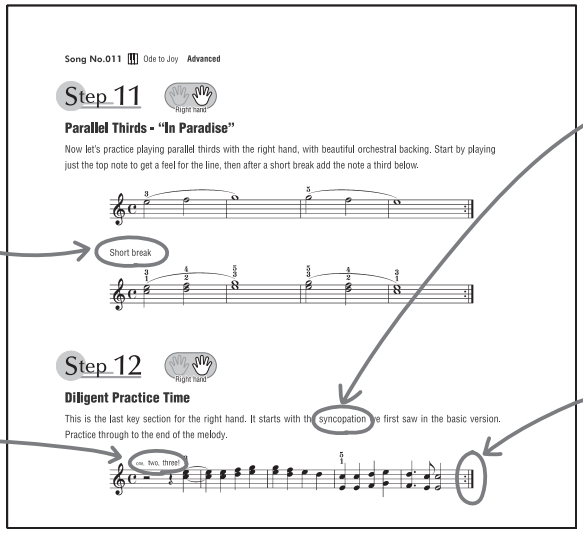
Which song should you choose?

- If this is the first time you’ve played a keyboard, we recommend the basic version of an easy song such as “Twinkle Twinkle Little Star” or “Ode to Joy”.
- If you only have a little experience on the keyboard, the Basic sections are the best place to start. The Basic section provides many hints that will make the Advanced section easier.
- Going through the steps in numerous songs is a great way to become familiar with the keyboard. If you find a step you really enjoy and learn to like the song as a result, you’re well on your way to mastery!

Before beginning each step, listen to the performance while reading the complete score. Doing this will give you a good mental “image” of the song’s structure and flow. When you have an overall feel for the song, press the [KEYS TO SUCCESS] button and start practicing the steps.



Short Break
There will be a short break before you need to play the next note. But it might not be too long to be ready!

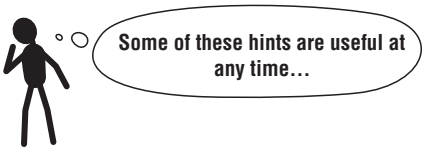


Musical Glossary
Special terms are explained in the Musical Glossary on pages 9 - 10. Try to learn them all.

Lead-ins ("…three, four!" etc.)
Wherever you see a lead-in like this you will hear a cue to start playing, so don't miss it!

Number of Repeats
The number of repeats might be different for each step. Repeated practice is the key to improvement!

A score of 60 or higher means you pass!
Your reward is a round of applause... or a rousing ovation for an even higher score!



Step Practice Hints

- If playing with both hands is difficult, it's OK to practice one hand at a time. Sometimes it's the fastest way to learn.
- Note names are written on the score in some steps. If you encounter notes you're not familiar with elsewhere, feel free to write in the note names yourself.
- Listen to the lead-in carefully so you'll know when to start playing.
- If you'd like to practice at a slower tempo, simply press the [TEMPO/TAP] button and use the [-] button to reduce the tempo until it is easy to follow.
- Depending on the selected step the metronome may initially be ON or OFF. You can also switch it ON or OFF yourself.
- The Waiting function makes it easy to find the notes to be played on the keyboard. This can be a great way to prepare for a lesson.
- You can use the [PAUSE] button to take a break during longer steps. You'll still get the appropriate number of points when you finish the step.
- Use the "Song Volume" function to reduce the accompaniment volume, or the "M.Volume" function to increase the keyboard volume to hear what you're playing more clearly.

Play Along with the Learn to Play Orchestra!

During normal Song Mode playback you can use the PART buttons to mute the orchestra parts. When you've mastered a song and earned your three stars, select the Song mode and have fun playing along with the orchestra.

Musical Glossary

Monophony Single notes played independently.

Polyphony Multiple notes of different pitch played simultaneously.

Polyphonic Performance The act of playing multiple notes simultaneously.

Semitone and Whole Tones Regardless of whether the keys are white or black, the pitch interval between adjacent keys is a semitone. Two semitones make up a whole tone.

Interval The difference in pitch between two notes is known as an "interval".

- **Third** A "third" is the interval between three whole tones. In the C diatonic scale (that's the scale without sharps or flats: C-D-E-F-G-A-B) the interval between C and E is a third, as is the interval between E and G.
- **Sixth** A "sixth" is the interval between six notes of the diatonic scale.
- **Octave** An "octave" is an interval of eight diatonic notes.
- **Playing Octaves** "Playing octaves" is a performance technique in which notes an octave apart are played simultaneously.

Phrase Phrases are sections of a melody that naturally stand on their own, much like sentences in a paragraph. No specific length is defined.

Obbligato A separate melody that has a similar contour to the main melody.

Counterpoint A separate melody that is harmonically related to the main melody, but has independent contour and rhythm.

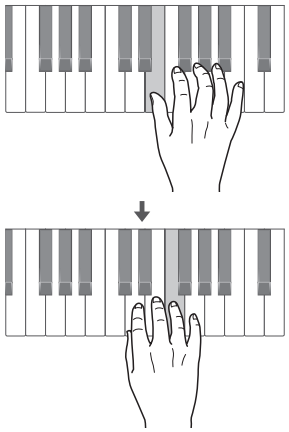
Thumb Under, Finger Over, Finger Ready, and Finger Change

Piano-specific fingering techniques that make keyboard fingering as smooth and easy as possible.

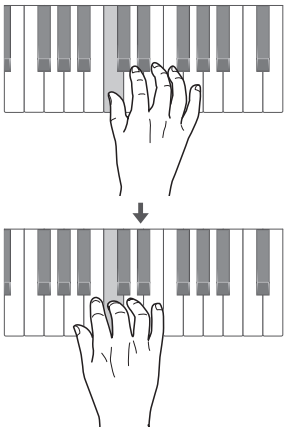
Thumb Under The thumb (finger 1) moves under another finger that is playing a note.

Finger Over A finger moves over the thumb (finger 1) while the thumb is playing a note.

Finger Ready While one finger is playing a note, another finger moves into position to play the next note.



Finger Change A finger that is playing a note is replaced by another finger.



Staccato Play short, disconnected notes. Indicated by dots above or below the notes, or "*staccato* (*stacc.*)" written on the score.

Legato Play smoothly connected notes. A slur marking indicates the notes to be played legato, or "*legato*" may be written on the score.

Slur The slur marking indicates notes to be played legato. It can also be used to define musical phrases.

Tenuto Play notes for their full length. Indicated by short lines above or below the notes, or "*tenuto* (*ten.*)" written on the score.

Tie A tie joins two notes of the same pitch to form one long note, the length of which is the sum of the lengths of the joined notes.

Fermata Pause briefly, and then carry on.

Syncopation Unexpected variation of the normal strong-weak pulse of a rhythm.

Auftakt This refers to a melody that starts on the weaker upbeat before the normally accented beat at the beginning of a measure.

Arpeggio An arpeggio is essentially a chord played one note at a time, similar to the effect of strumming a harp.

Glissando A slide produced by running a finger or the heel of your hand up or down the keyboard.

Chord Harmonic structures created by adding intervals of thirds.

Harmony The pleasing resonant effect produced by playing multiple notes of differing pitch simultaneously.

Ornament A musical flourish that is added to "ornament" the melody line.

Grace Note An ornamental note played immediately before the main melody note.

Turn A musical ornament that begins one note above the melody note, descends to one note below the melody note, and then returns to the melody note.

Expression Directive Notes at the beginning of a score describing how the piece should be played.

Ensemble A number of instruments and/or voices performing together is an "ensemble".

Take a step up from the basic section with these more dazzling steps.
The middle section begins with the "dolce" (sweetly, gently) expression directive, and gradually changes to a bright, lively mood.
After enjoying the light, free atmosphere of the middle section, the melody begins once again.
The challenge begins... this will be a great addition to your repertoire.

Play with both hands as if gently telling a story. It might help to sing or hum the melody as you play.
Similar melody lines and rhythms are repeated in this song, so there aren't as many sections to practice as you might think. Enjoy learning each section as you build proficiency.

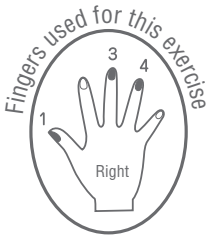
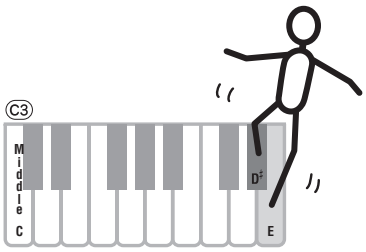
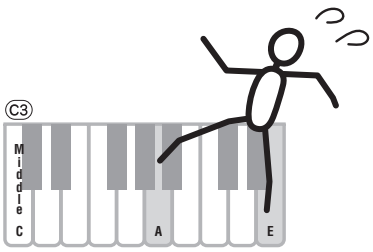
Step 01

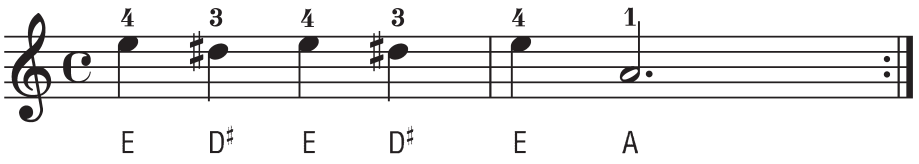


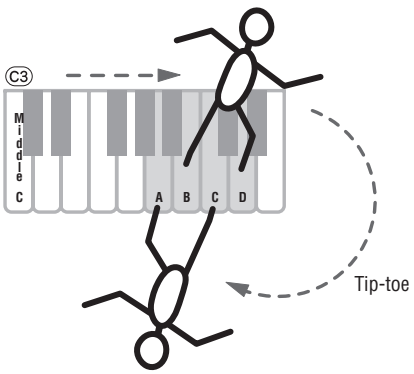
Warm-up Exercise - “The Semitone Mystery”

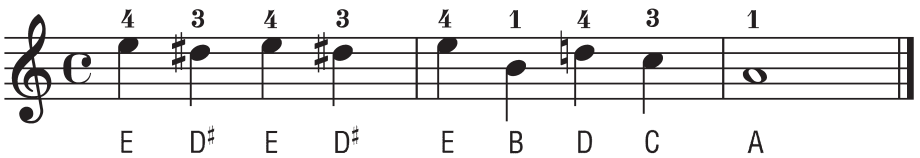
Let’s start with a warm-up exercise using three fingers of the right hand.
We’ll start by ascending and descending the white and black keys. Check out the illustrations until you understand how the fingers are supposed to move, then get started!
You’ll find it easier to play if you bend your fingers slightly.











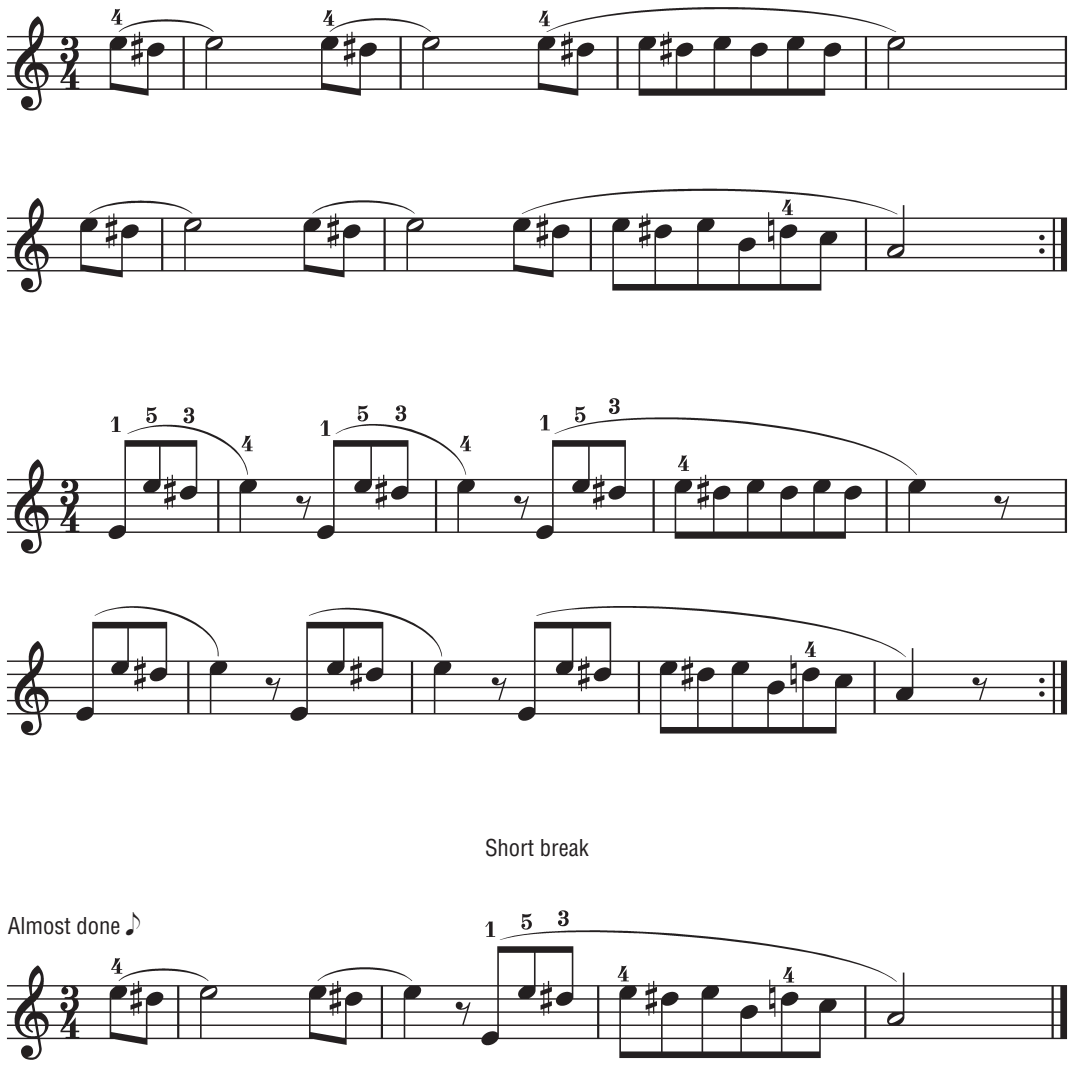
Go back to the beginning and play it again.

Step 02

Right hand

Diligent Practice Time

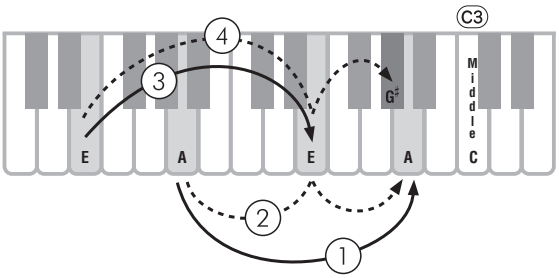
Right! Now that we're warmed up let's try playing along with the orchestra in 3/4 time.
The melody will be built up little by little.
Compare each line... notice that many of the shapes formed by the notes are very similar.



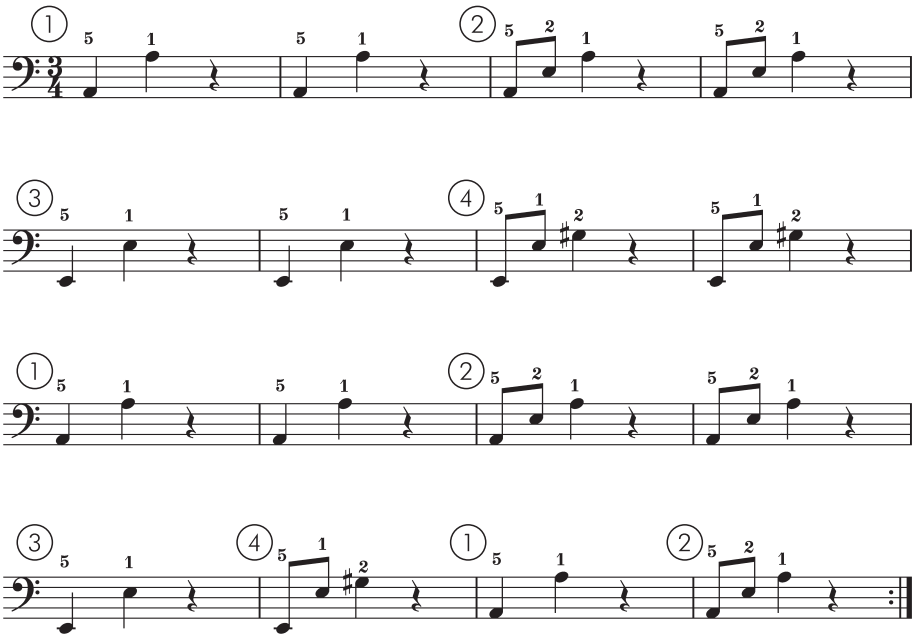
Step 03

Left hand

Warm-up Exercise - “Basic Accompaniment”



And now a warm-up exercise for the left hand.
It’s important to spread your fingers widely from the start.
Don’t play the black keys too strongly.

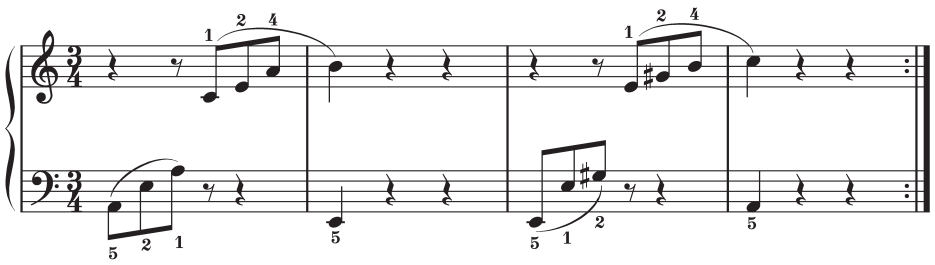


Step 04

Both hands

Diligent Practice Time

Connect the notes smoothly, as if the left hand were passing them to the right hand. You’ll be able to play smoothly if you move the left hand into position for the next phrase as soon as it finishes playing the first phrase.



Step 05

Both hands

First Half Review

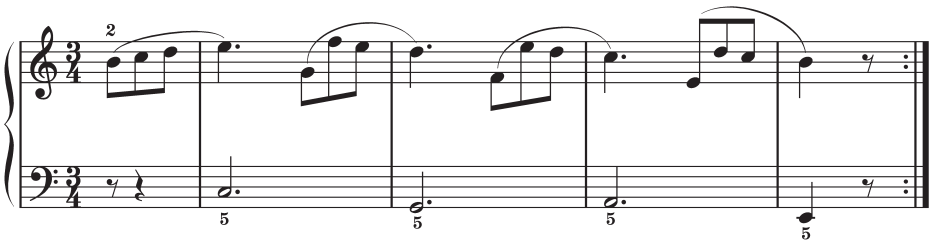
You've reached the halfway step! Have you learned all the material provided in the preceding steps?
Now let's go back and play through all the first-half exercises. If you find that you're having trouble playing any of the material, go back and review the steps using the Step Map as a guide.

Step 06

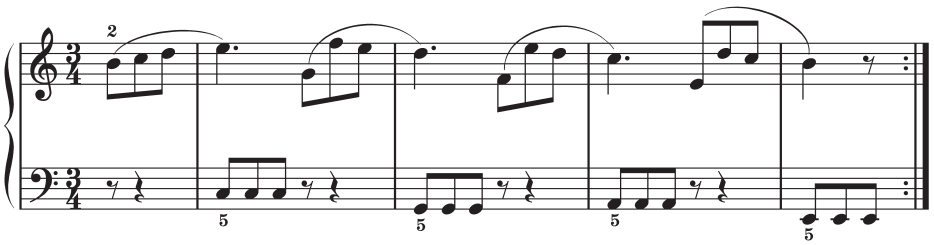
Both hands

Diligent Practice Time

OK, let's begin the second half!
You'll be able to play the melody nicely if you lift your fingers from the keyboard between the slurs.
It might be easier to grasp the key release timing if you sing along with the melody.
Don't panic and play too strongly where the left hand has to play short notes.



Always have left-hand finger 5 ready to play the next note!



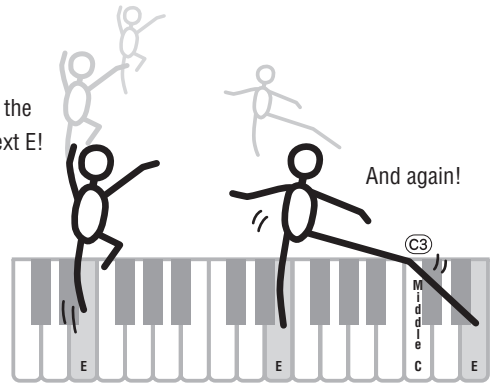
Step 07

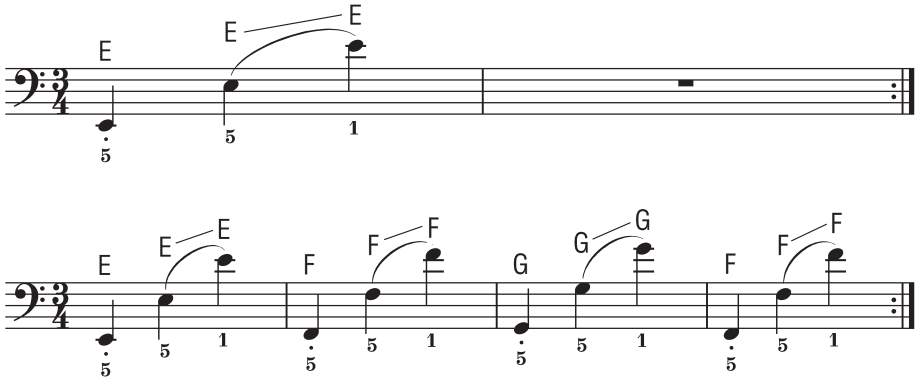
Left hand

Warm-up Exercise - “The Jump Competition”

The first note has a staccato dot.

Spread your fingers wide and jump quickly to the next note!





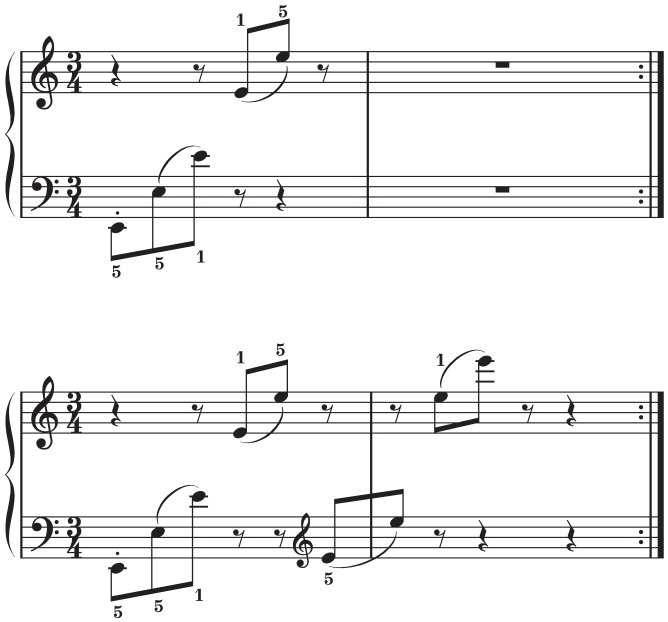
Step 08

Both hands

“EEEEE!”

The only note in this step is E!

Make the connection between the left and right hands as smooth as possible.

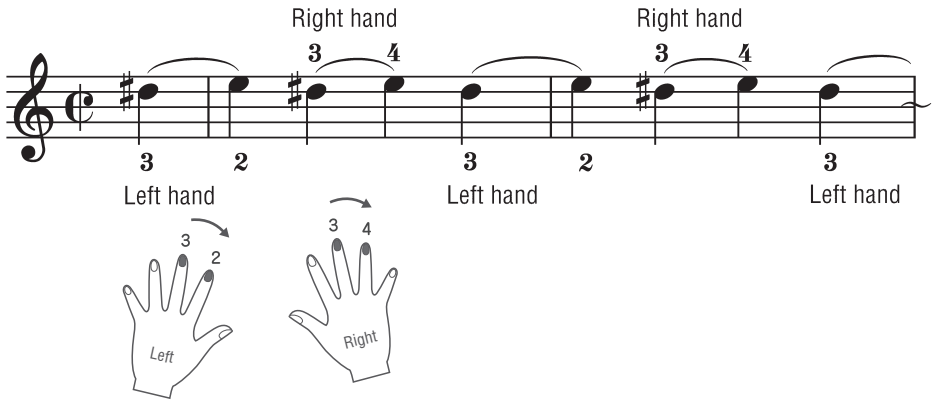


Step 09

Both hands

“Left! Right! Left! Right!”

Play “D♯ E” repeatedly, alternating the left and right hands.
Have the next hand ready in position to play D♯ so you won’t have to rush.



Step 10

Both hands

Second Half Review

Try playing all the way through the second half.
As we did after the first half, if there are places you can’t play with confidence go back and review the steps.

Step 11

Both hands

Play the Whole Song!

This is the finishing step!
Don’t be afraid of making mistakes. Just concentrate on playing the entire song from start to finish.
Practice this with the lessons learned in each step in mind, and gradually you’ll master the whole song.

These steps focus on the middle section that wasn't included in the basic version of the song. The right hand plays quick 16th notes in succession, but if you keep your shoulders and arms relaxed and match the timing to the left-hand notes it shouldn't be too difficult.

The middle section is to be played brightly and moderately loud. Play the other sections in a gentle, flowing manner to add expression to the song overall.

Step 01

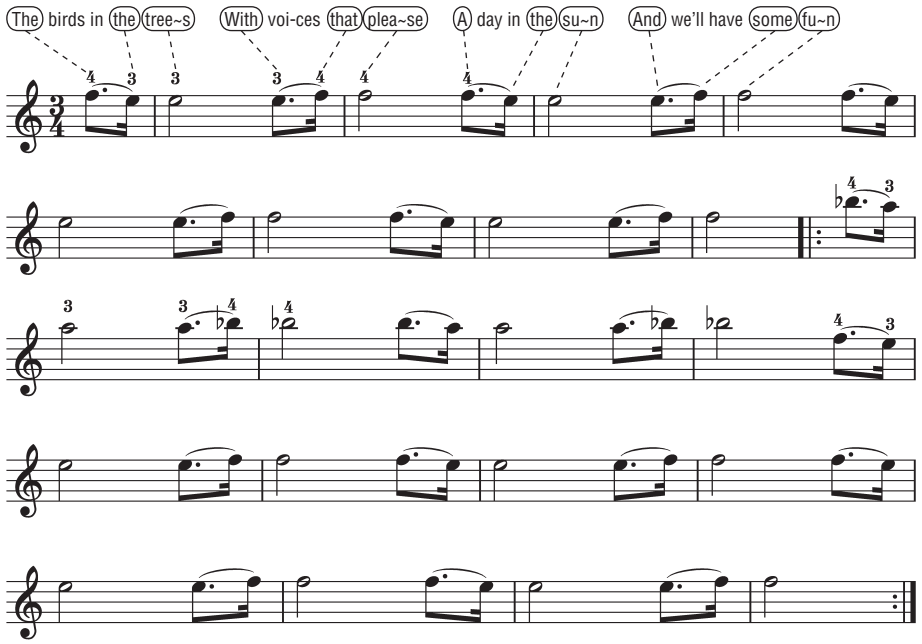
Right hand

Dotted Rhythm Practice

Dotted rhythms like this might look difficult, but you can make them easier to understand (and fun) if you match the beats up with words.

In the example below the circled syllables and words correspond to notes on the score.

Play this with a gentle touch. No need to pound the keys!



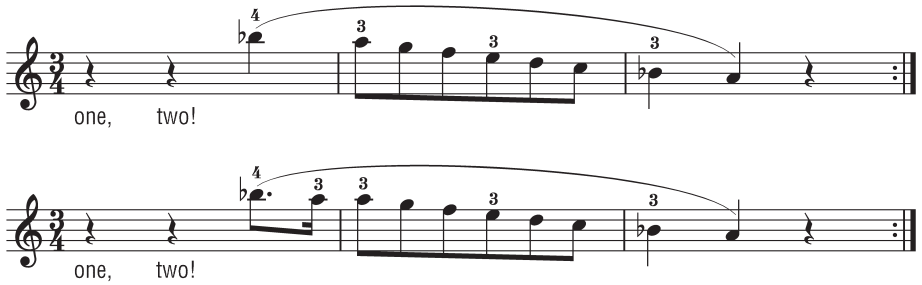
Step 02

Right hand

Dotted Rhythms and Scales

If you sing along while playing scales you'll be more prepared to play each note and will be able to play smoother.

Keep your fingers under control!

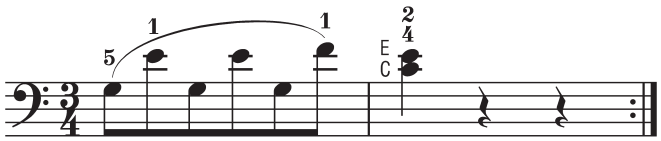


Step 03

Left hand

Special Practice - “For a Steady Left Hand”

To make sure that fingers 1 and 5 of your left hand don’t waver too much, try placing a coin on the back of your left hand. Don’t let the coin fall off while you’re playing!
Play the last C and E softly.



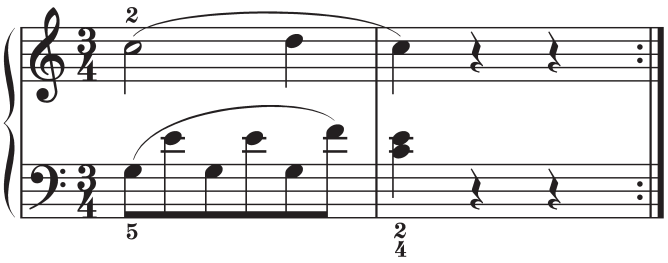
What’s going to happen?
How long can you keep this up?
Do your best to complete the exercise.
The trick is to keep it steady!

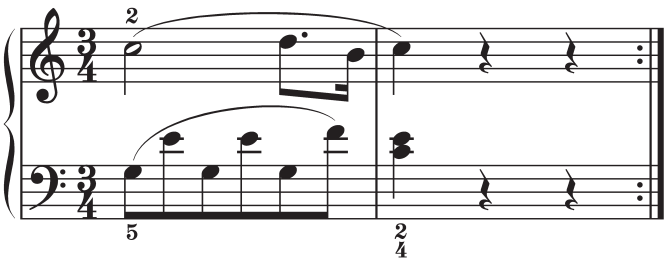
Step 04

Both hands

“The Steady Left Hand Meets the Relaxed Right Hand”

Let’s try adding the right hand to the left-hand part you practiced in Step 03.
If you got through the last exercise without giving up, this will be easy!





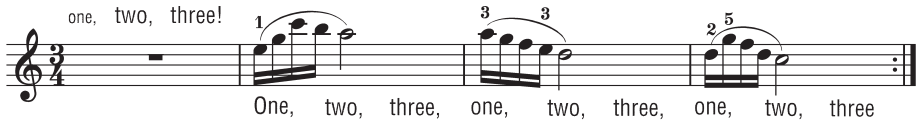
Is that coin still on the back of your left hand, even after adding the right hand?

Step 05

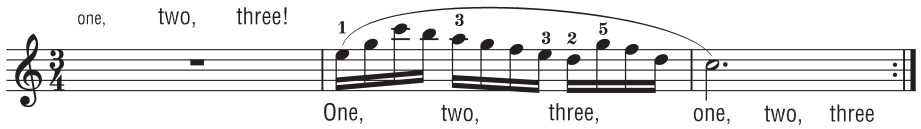
Right hand

Diligent Practice Time

Play this while counting “one, two, three” in time with the metronome.



Next, join the parts!

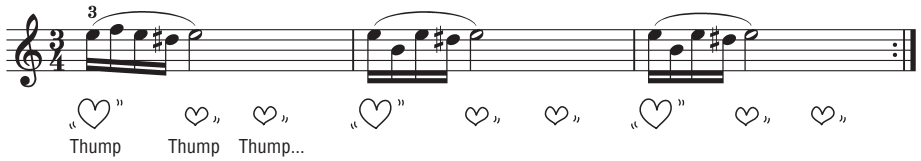


Step 06

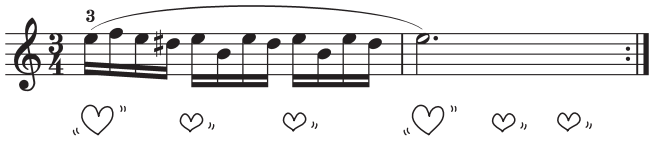
Right hand

“Suspense Theater”

This exercise uses only four notes: B, D♯, E, and F. Place your fingers on the corresponding keys before you begin, then you’ll be able to play the exercise smoothly.



Short break



Step 07

Both hands

Play the Whole Song!

This is the finishing step!

Don’t be afraid of making mistakes. Just concentrate on playing the entire song from start to finish.

Practice this with the lessons learned in each step in mind, and gradually you’ll master the whole song.

Twinkle Twinkle Little Star

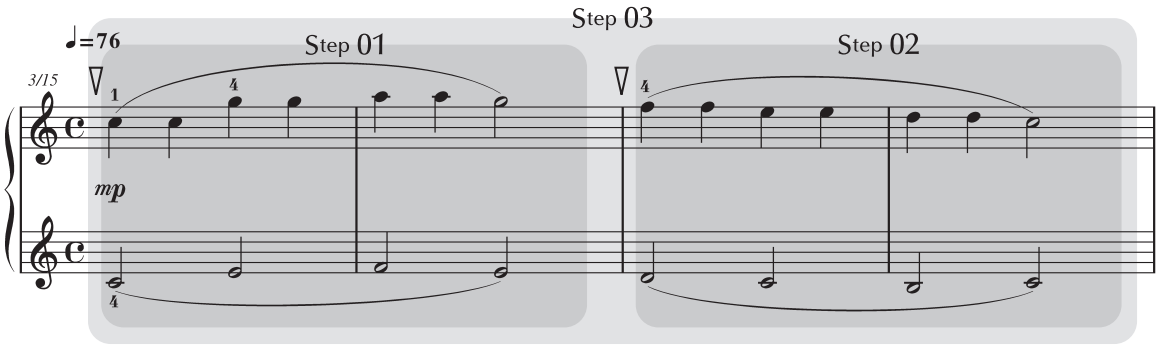
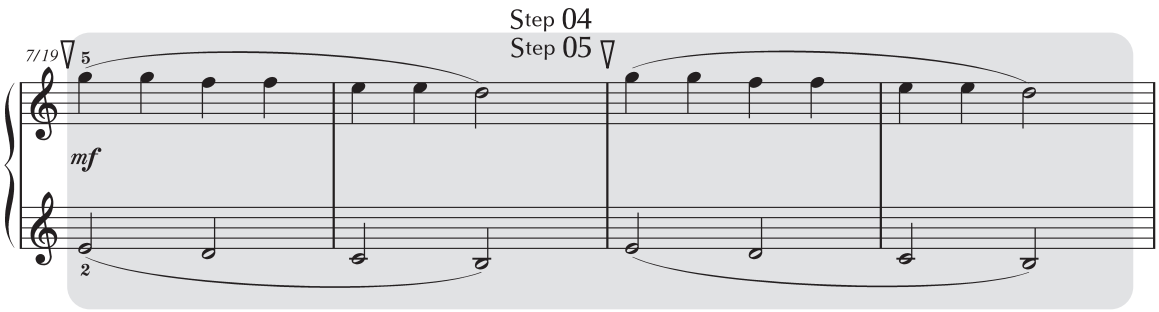
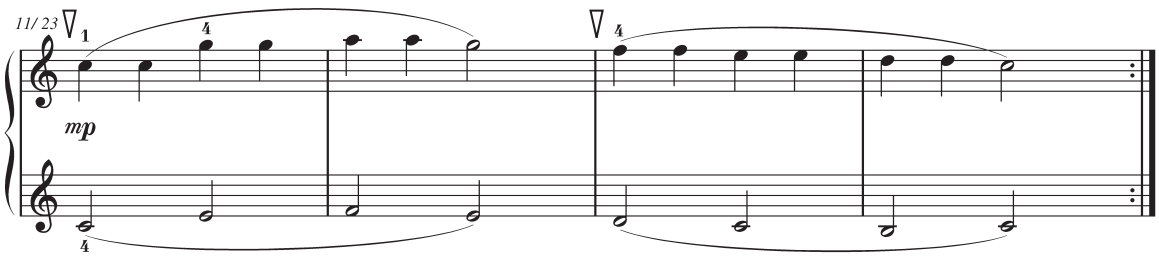
～With Step Map～

You know the melody but are afraid that playing with both hands will be difficult? Not at all! We've made it easy by dividing it into two-measure segments.
Just learn the three patterns used and you'll be able to play the whole song!





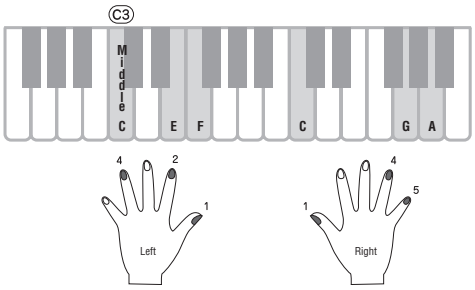


Step 01

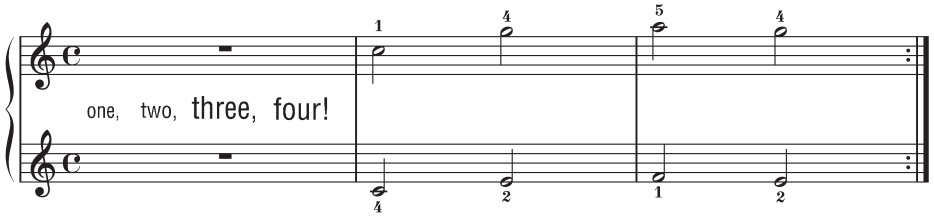
Both hands

The First Step (The first 2 measures)

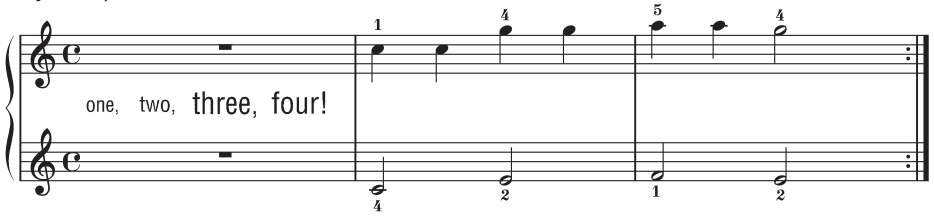
First locate the keyboard position then try playing slowly.



To begin, relax and find the keyboard position.



The keyboard position is the same as for the score above!



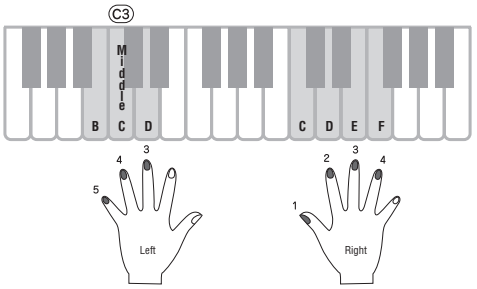
...no problem, that's the first two measures done!

Step 02

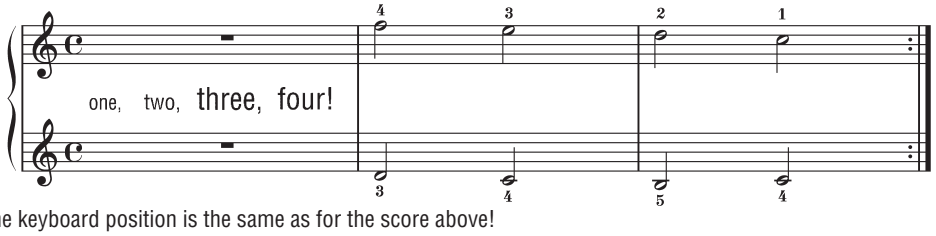
Both hands

The Next Step (The next 2 measures)

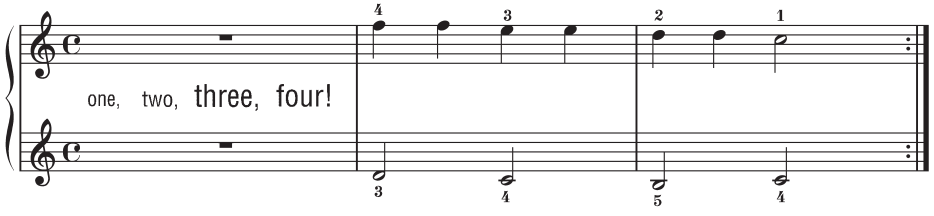
As in the last step, begin by locating the keyboard position.



Find the keyboard position just like you did for the first step.



The keyboard position is the same as for the score above!



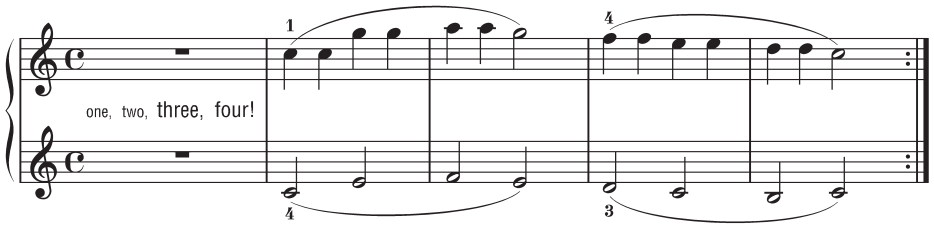
And that's the next 2 measures done!

Step 03

Both hands

The First and Next Steps Together! (Beginning to 4th measure)

Now connect Step 01 and Step 02!



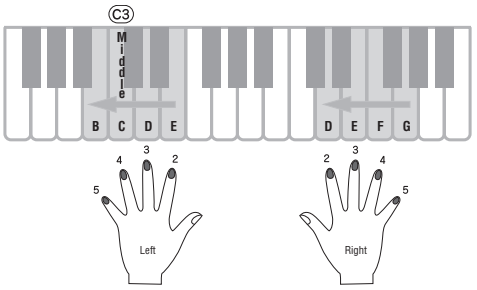
You've played up to here!

Step 04

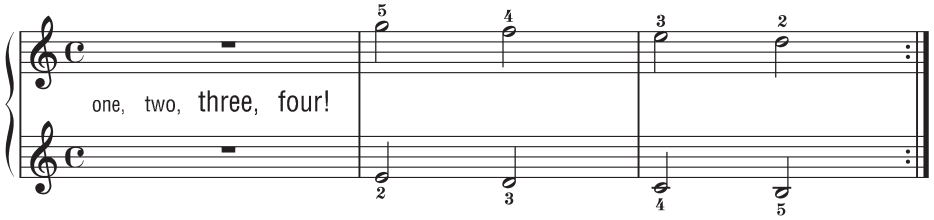
Both hands

The Last Step! (That was quick…)

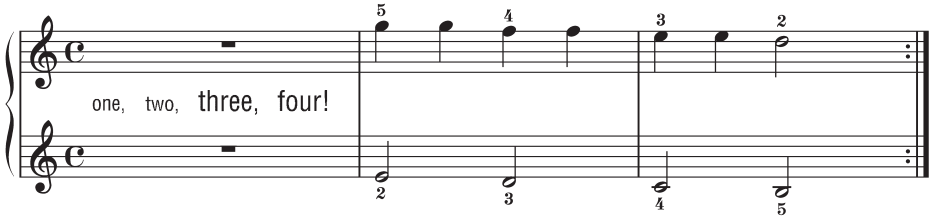
The left-and-right-hand notes descend one at a time.



And once again... locate the keyboard position.



The keyboard position is the same as for the score above... (this is becoming familiar too)!



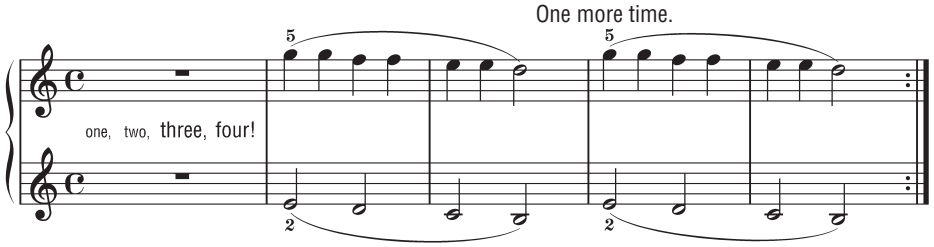
Getting close to completion.

Step 05

Both hands

Repeat the Last Step!

If you can play this pattern you're almost there!



Step 06

Both hands

You should be able to see those twinkling stars by now.

Play the Whole Song!

This is the finishing step!

Don't be afraid of making mistakes. Just concentrate on playing the entire song from start to finish.

Practice this with the lessons learned in each step in mind, and gradually you'll master the whole song.

Step 07

Right hand

Bonus Event: The Twinkle Twinkle Little Star Special!

Welcome to the Twinkle Twinkle Little Star Special!

How about a completely different version?

Relax, and try not to let the accompaniment affect what you're playing. There's a black-key note that we haven't used before, but you'll be fine once you learn it.

Off you go... enjoy your journey into some new musical territory!

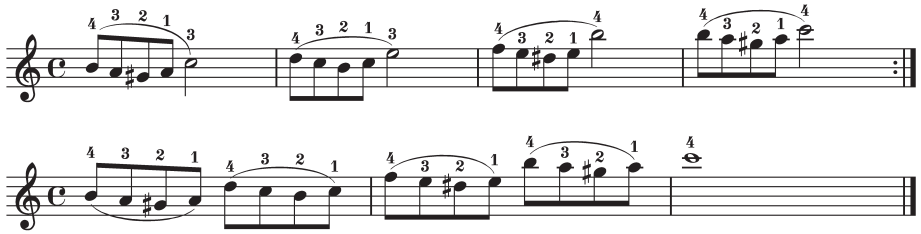
Step 01 Warm-up Exercise - “Winter Sonatine”

Right hand

Eh? This is practice for the Turkish March?

Start playing with finger 4, but keep finger 1 close by and ready. That’s the key to playing this part smoothly.

Now enjoy a romantic moment with the orchestra!

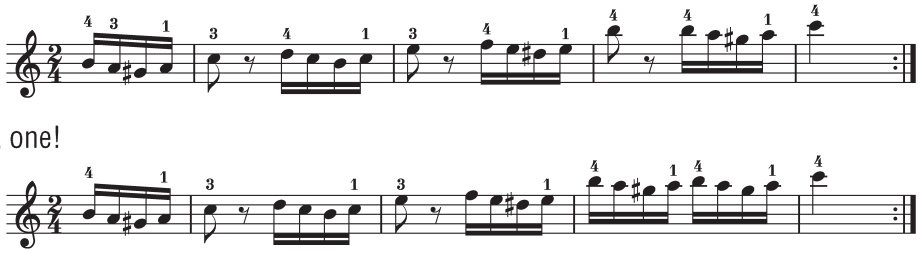


Step 02 Diligent Practice Time

Right hand

When you’re properly warmed up, it’s time to tackle the melody.

Don’t forget the key to playing it smoothly that we just learned.



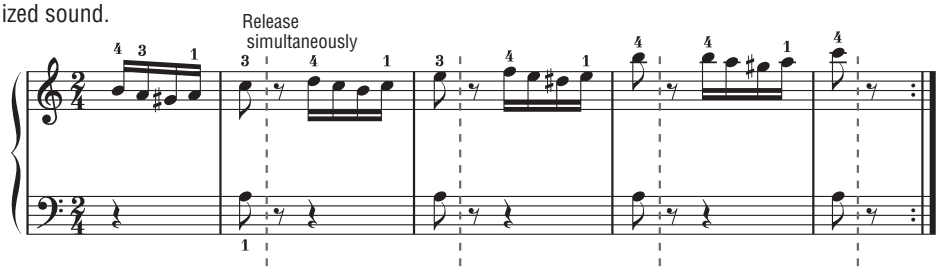
...two, one!

Step 03 Diligent Practice Time

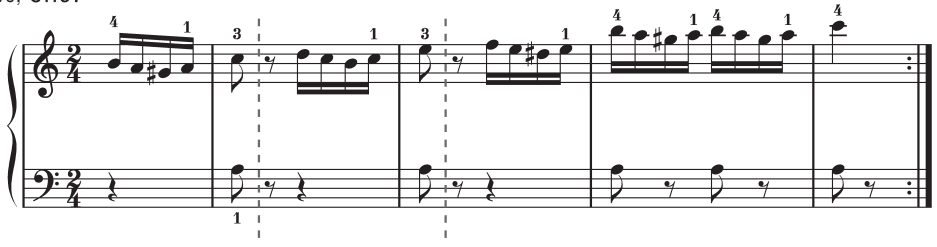
Both hands

Try playing with both hands.

Play the left-hand eighth notes gently. Release the left-hand and right-hand notes simultaneously for a clean, synchronized sound.



...two, one!

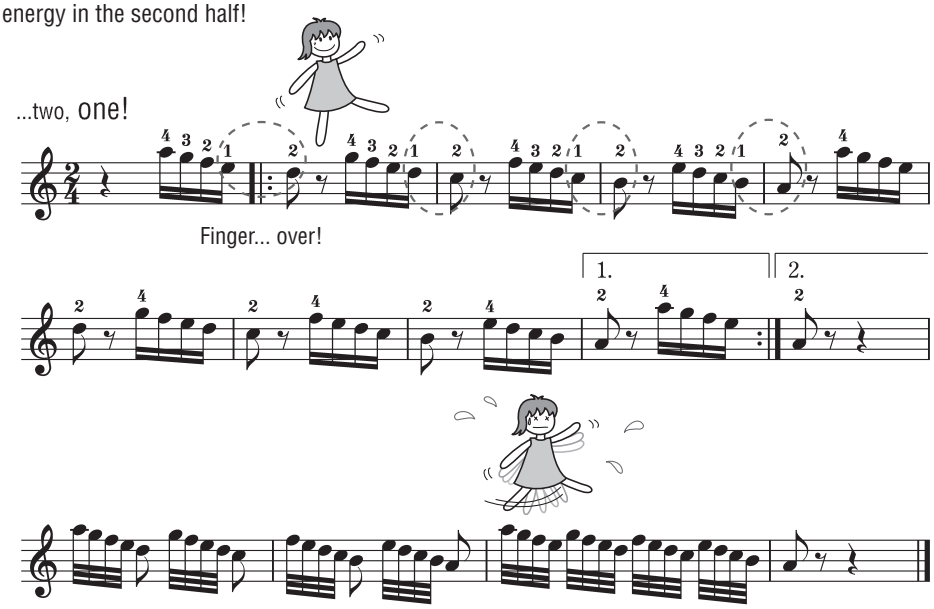


Step 04

Right hand

Special Practice - “The Special March”

Try playing the Special March melody using the “finger over” (page 9) technique.
Enjoy the energy in the second half!

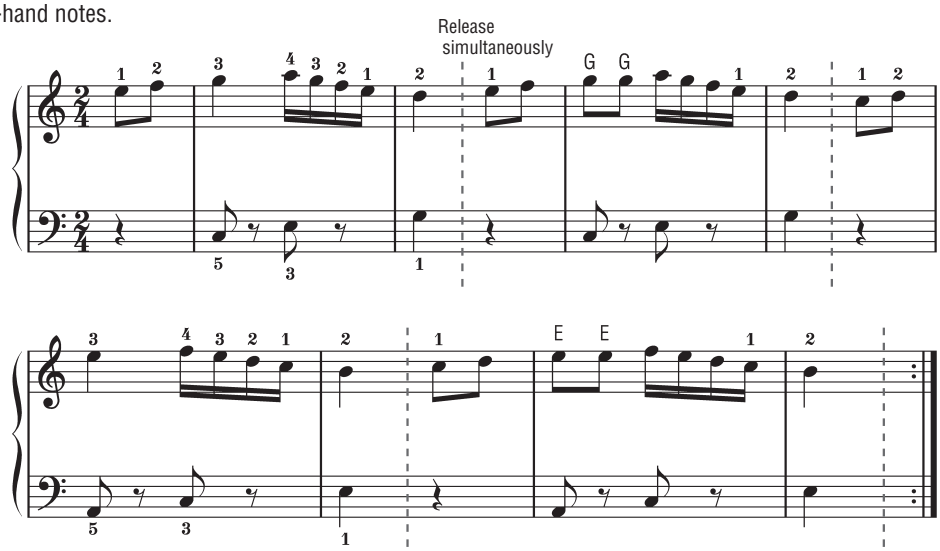


Step 05

Both hands

Diligent Practice Time

Don’t rush the right-hand “G-G” and “E-E” eighth notes.
Play the last quarter notes of the left-hand “C-E-G” and “A-C-E” parts with care, releasing them simultaneously with the right-hand notes.

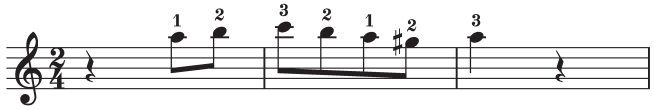


Step 06

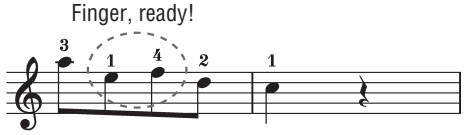
Right hand

"Technical Point!"

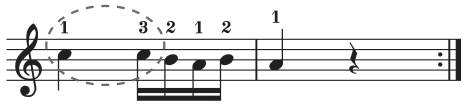
A number of techniques that are unique to the piano such as "finger ready" and "finger change" (page 9) are used in the right-hand melody. Prepare early for the next note to be played, and play each note carefully.



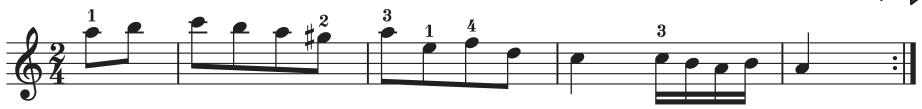
Finger, ready!



Finger, change!



Now connect the parts together...



Step 07

Both hands

Ode to Joy

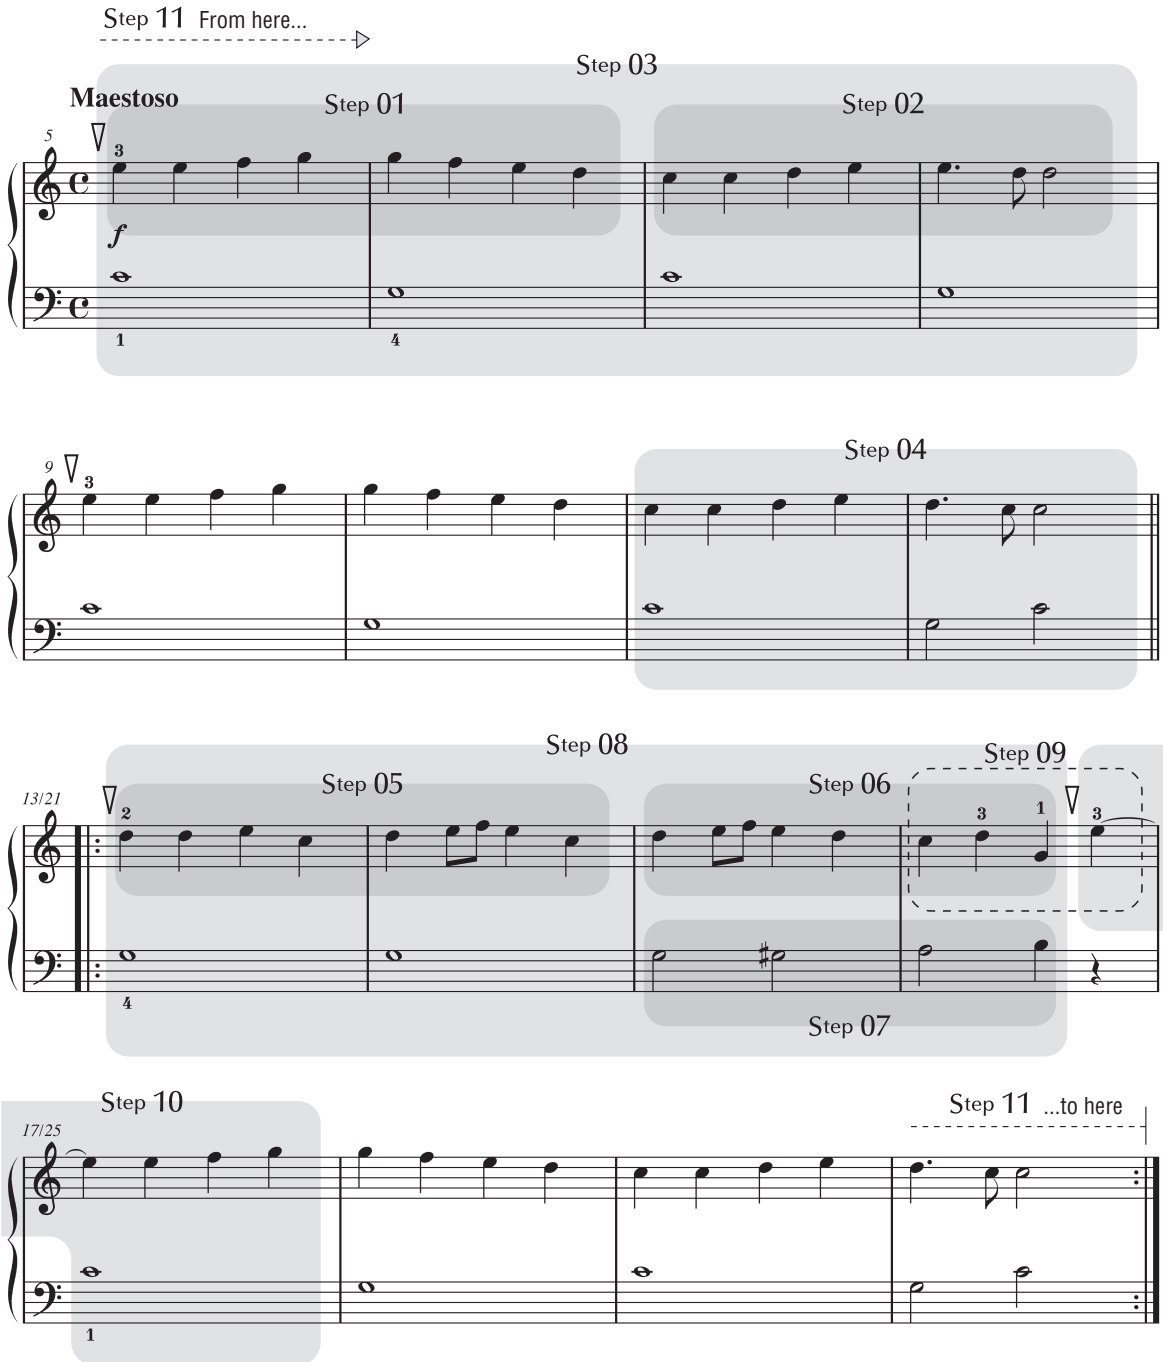
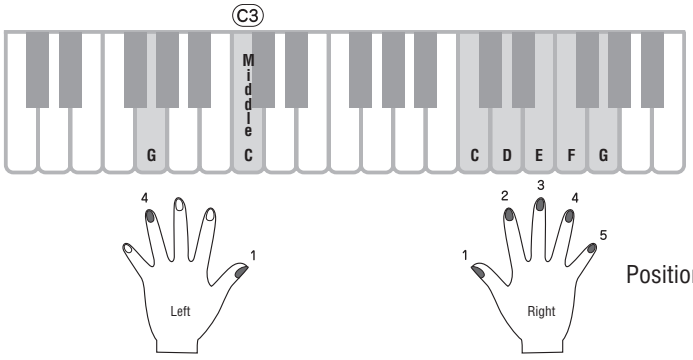
～With Step Map～

In this version you play monophonic lines with both hands. No tricky techniques are required.
If you know the melody you'll be fine. Ready? Away we go.



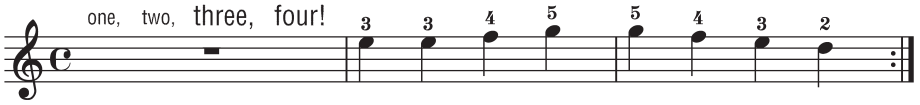


You'll only play the colored-in keys in the first half.

Position your hands here and begin!

Step 01 Basic Ascending and Descending

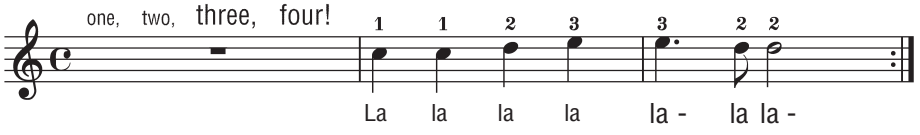
The climb from E to G and then the descent from G to D are the basis of the melody. If you can play this well, the rest is easy.



Step 02 Dotted Rhythm

This melody line, including a dotted note, follows the melody of Step 01.

Sing along with the example to get a feel for the rhythm.



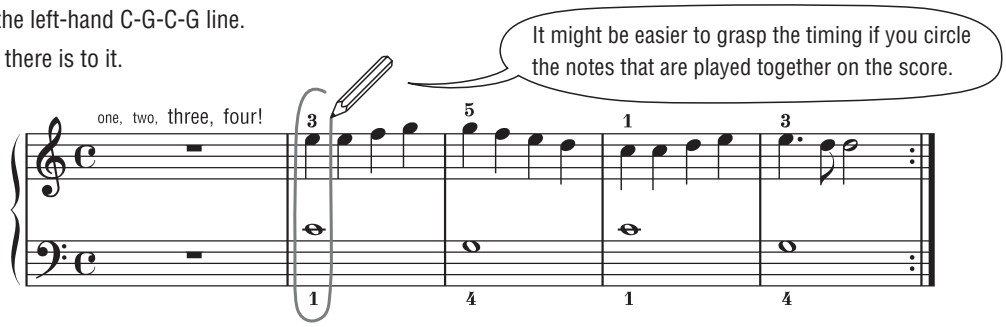
Step 03 "And all of a sudden… both hands!"

OK. So lets play with both hands.

Do the exercise in this order:

1. Connect Step 01 and Step 02, practicing with the right hand only.
2. Add the left-hand C-G-C-G line.

That's all there is to it.

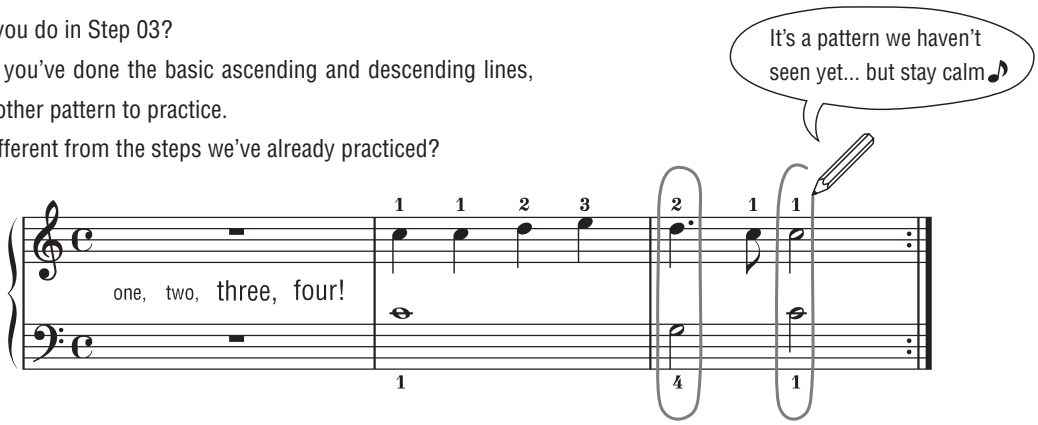


Step 04

Both hands

"CCDE?–??–"

How did you do in Step 03?
Now that you've done the basic ascending and descending lines, here's another pattern to practice.
What's different from the steps we've already practiced?

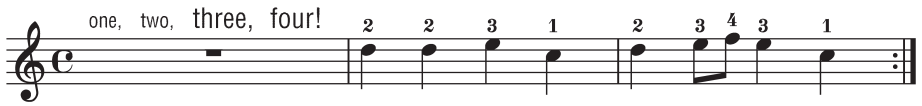


Step 05

Right hand

"Change"

And now, the second half.
This part of the melody signals that a change is about to occur. Doesn't it give you the feeling that a new chapter of the story is about to begin?

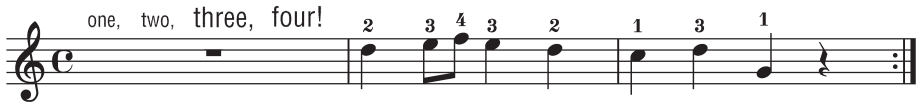


Step 06

Right hand

Diligent Practice Time

This melody line follows the one we learned in Step 05. Don't try to rush when you get to the last G.
Have finger 1 in position and ready a little early.

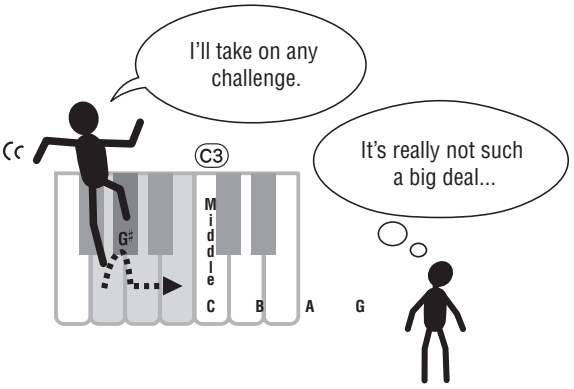


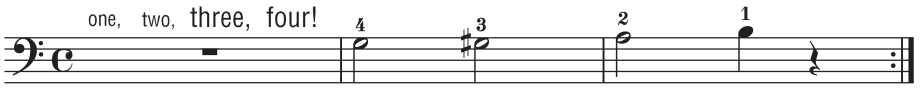
Step 07

Left hand

"Step On the Black Key"

This is the left-hand line that goes with the Step 06 right-hand line.
The notes ascend in sequence from G, with one black key along the way.
Step on the black key along with the orchestra.



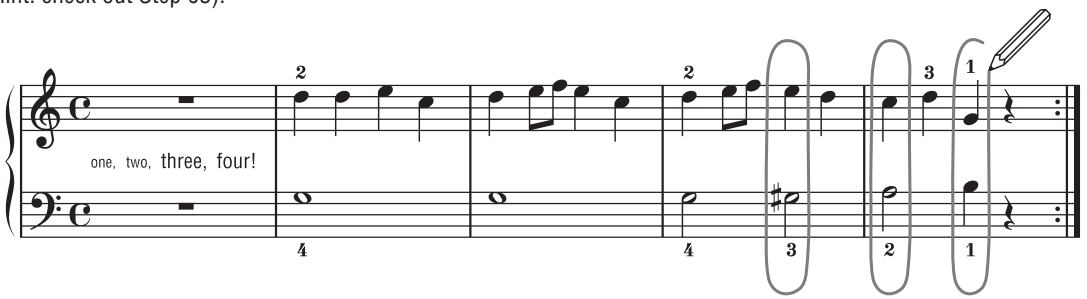


Step 08

Both hands

"Play with Both Hands"

Now you're ready to play with both hands.
What do you suppose the order of the exercise is?
(Hint: check out Step 03).

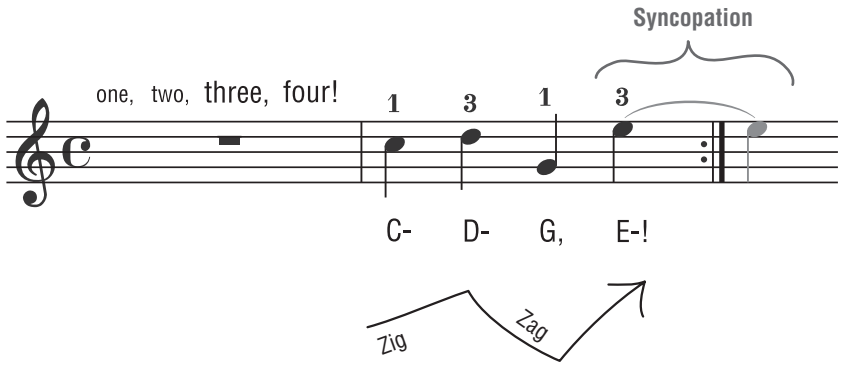


Answer:
1. Connect Step 05 and Step 06, practicing with the right hand only.
2. Add the left-hand G-G-G-G♯-A-B line.

Step 09 "Zig-Zag Path to E"

Right hand

Before getting into the final four measures, we come across a very distinctive syncopated phrase. Sing this zig-zag "C-D-G, E" line.

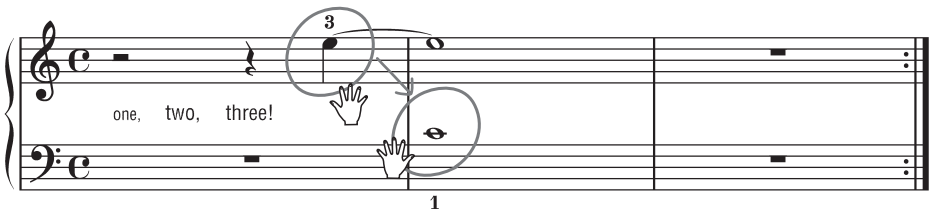


Step 10 "Right Hand then Left Hand"

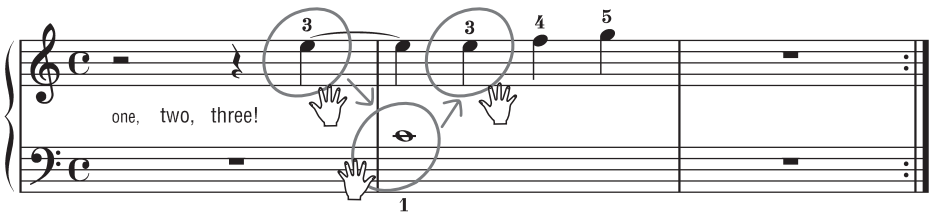
Both hands

Here's the syncopated E from Step 09, and the left-hand note that follows. We'll also play a little of the ensuing melody in the second half.

First, the right and left hands in sequence.

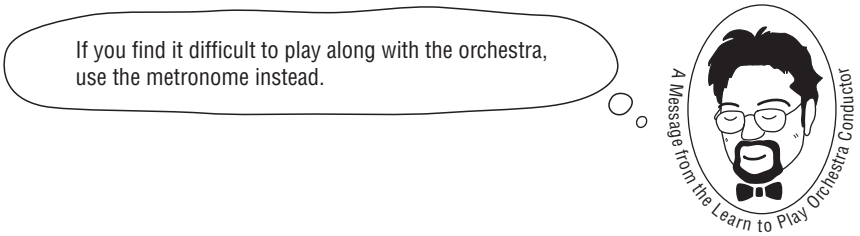


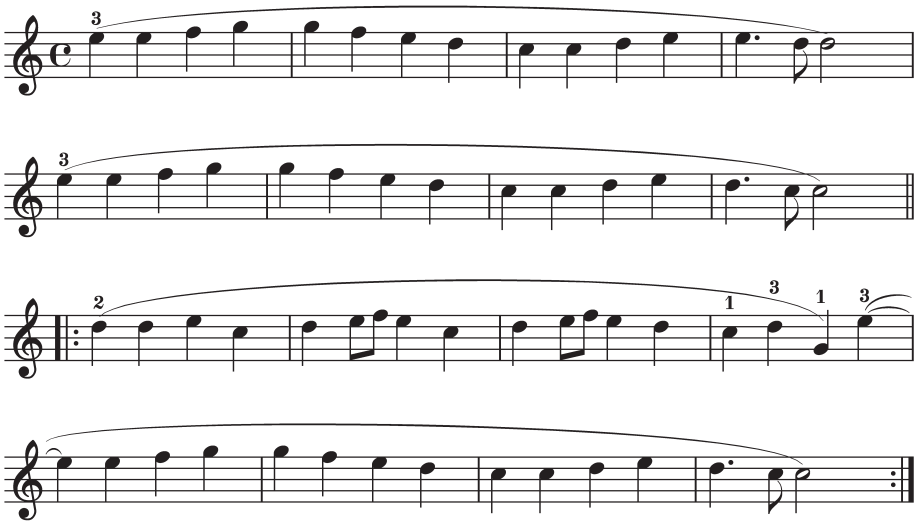
Then, right hand, left hand, and right hand again.



Step 11 "Right-hand Rehearsal: String Ensemble Version"

You've done well up to Step 10, so let's try playing the whole song all the way through.
But before we do that, let's rehearse by playing just the right-hand part with beautiful accompaniment from a string ensemble.





Step 12 Play the Whole Song!

This is the finishing step!
Don't be afraid of making mistakes. Just concentrate on playing the entire song from start to finish.
Practice this with the lessons learned in each step in mind, and gradually you'll master the whole song.

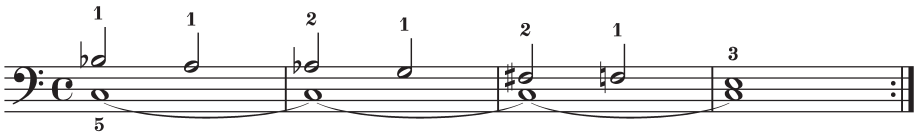
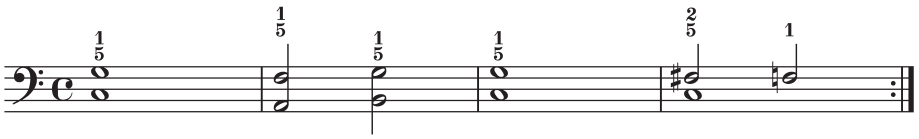
Step 01 Warm-up Exercise - "Left-hand Power"

Let's do a warm-up exercise for the left hand.
Play the phrase that descends in semitones while holding the bass note with finger 5. Enjoy the smooth harmonic transitions that occur when you play along with the orchestra.



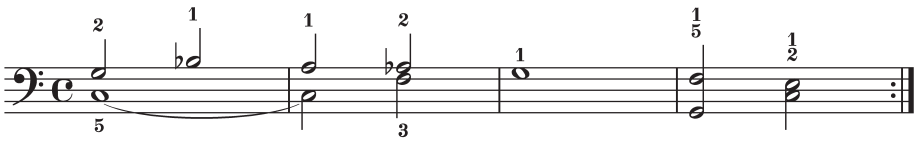
Step 02 Diligent Practice Time

Let's practice the first four measures of the left-hand part.
Play the notes for their full duration.



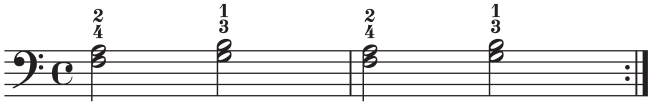
Step 03 Diligent Practice Time

These are the four measures that follow the part practiced in Step 02. The movement is a little more complex, but the warm-up exercise we did above should make it easy.



Step 04 Parallel Thirds - "Gently Flowing"

A number of third intervals appear in sequence in the left-hand part of the melody middle section. Connect them as smoothly as possible.



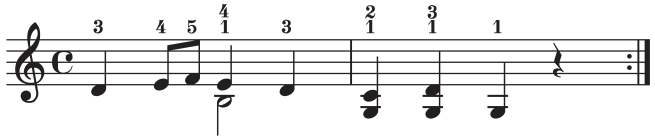
Step 05

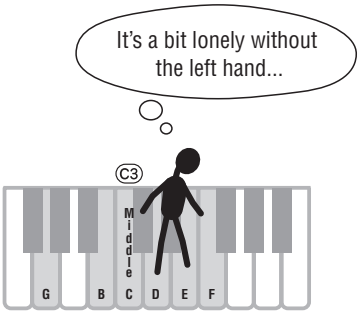
Right hand

"Right-hand Part Practice"

At last we come to the right-hand part.

In Step 07 we'll use both the right and left hands to play the harmony parts. But here we'll just practice the right-hand part.





Step 06

Left hand

"Left-hand Part Practice"

And this is the part that the left-hand will play.

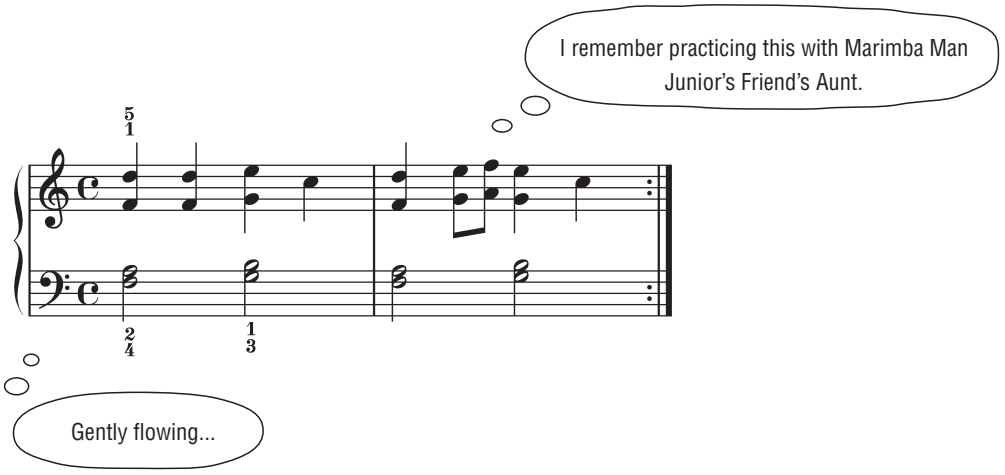
The left hand plays thirds while the right hand plays sixths. This section requires concentration to play well, but it's also the most impressive sounding section of the song.

If you have trouble playing any section, go back to the appropriate steps and practice again.



Step 11

Right hand

Parallel Thirds - “In Paradise”

Now let’s practice playing parallel thirds with the right hand, with beautiful orchestral backing.
Start by playing just the top note to get a feel for the line, then after a short break add the note a third below.

Step 12

Right hand

Diligent Practice Time

Step 09 "One Thing at a Time... Part 1"

Most players are intimidated by continuous sequences of 16th notes. If you practice one short section at a time it becomes easy!

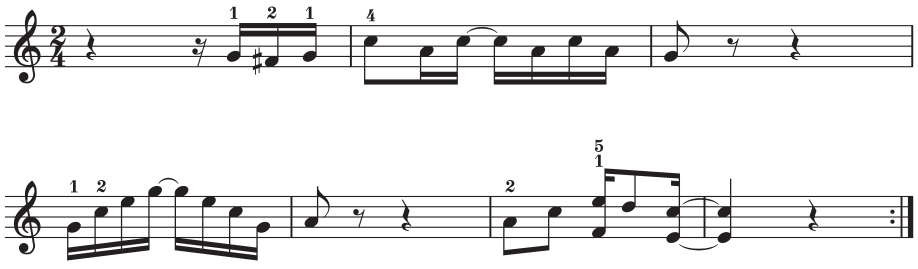
The rhythm is a little more complex than the last exercise. Learn the individual sections one group of notes at a time.



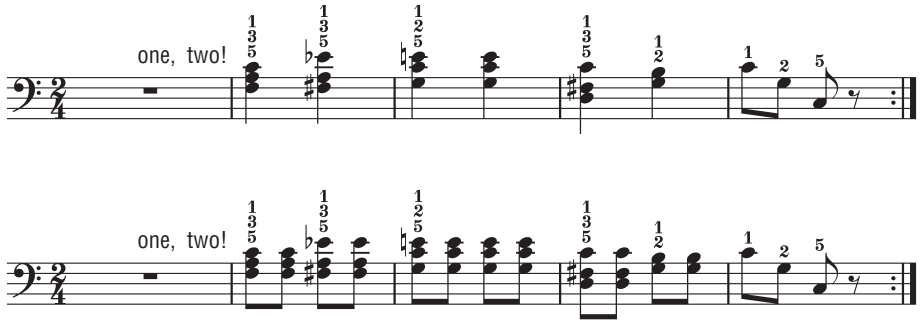
Step 11

Left hand

Diligent Practice Time

Approach this exercise in the same way as Step 06.

When you get comfortable with this, try to read ahead on the score a bit.



Step 12

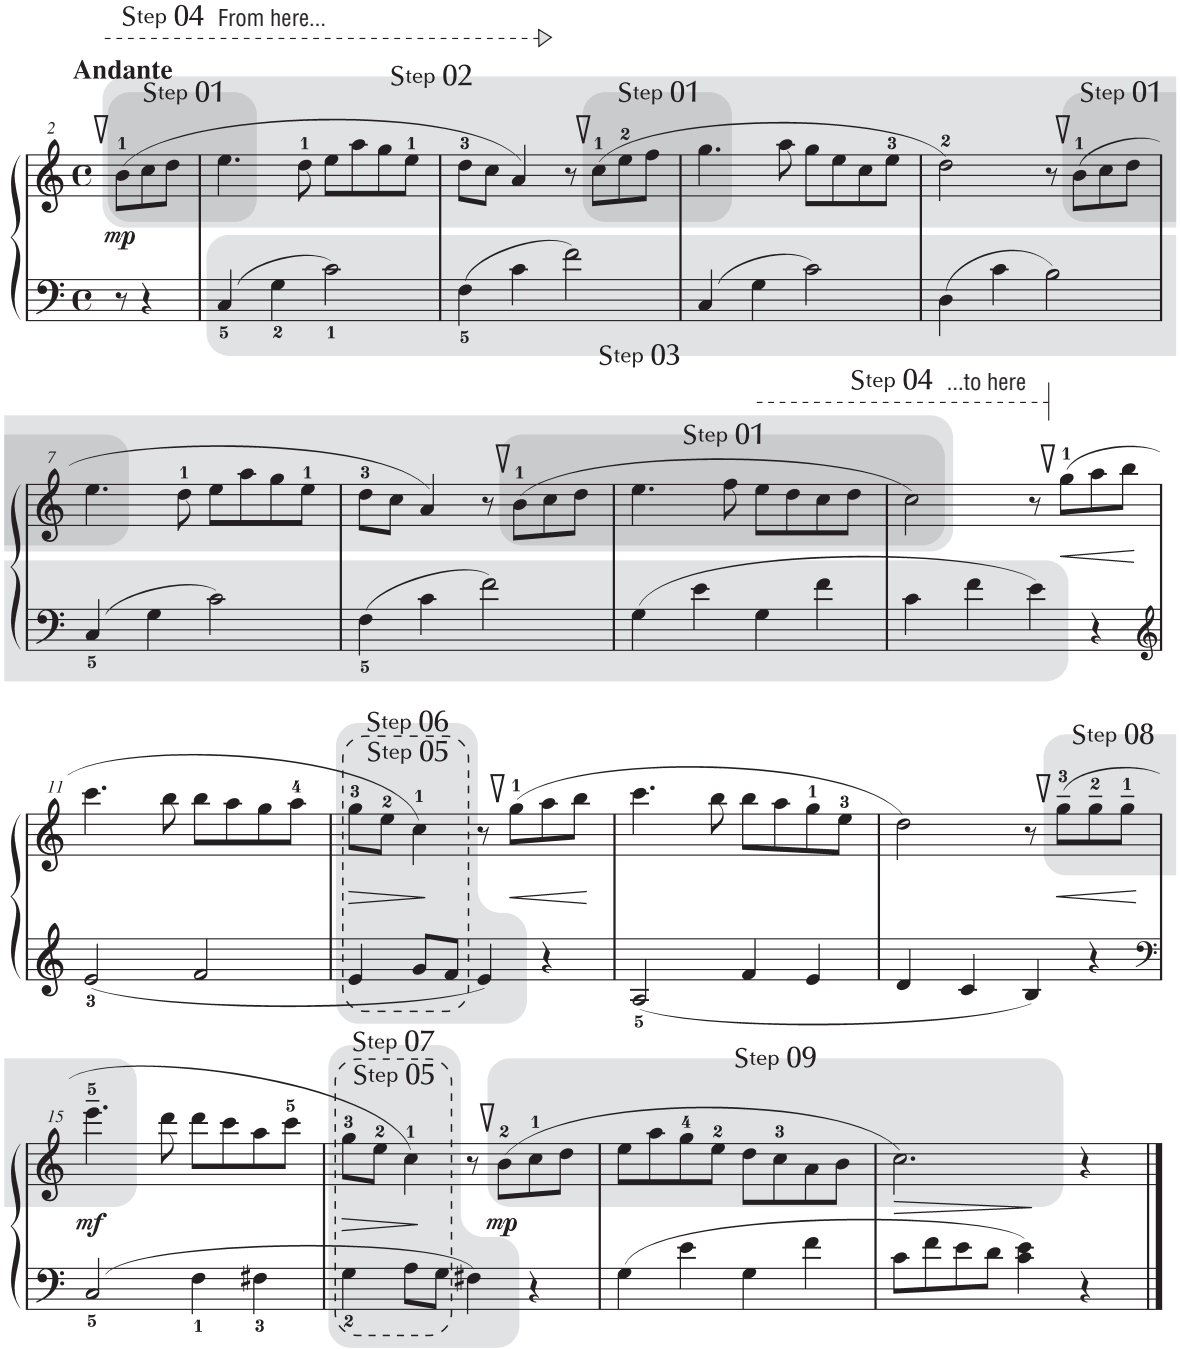
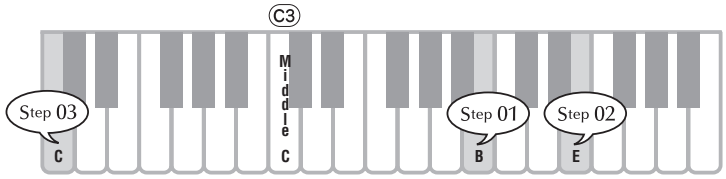
The melody begins with an auftakt, and the same rhythm is repeated a number of times. The left hand plays accompaniment in the first half, then counterpoint in the second half for different effects.

Play the 8th notes smoothly and gently, with expression.



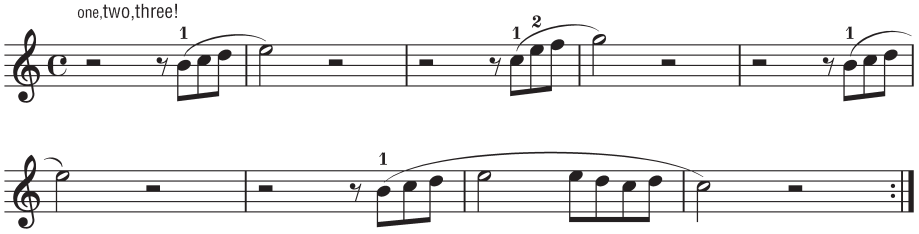
The starting note for
Steps 01 through 03.



When you've located the keyboard position
it's time to start practicing.

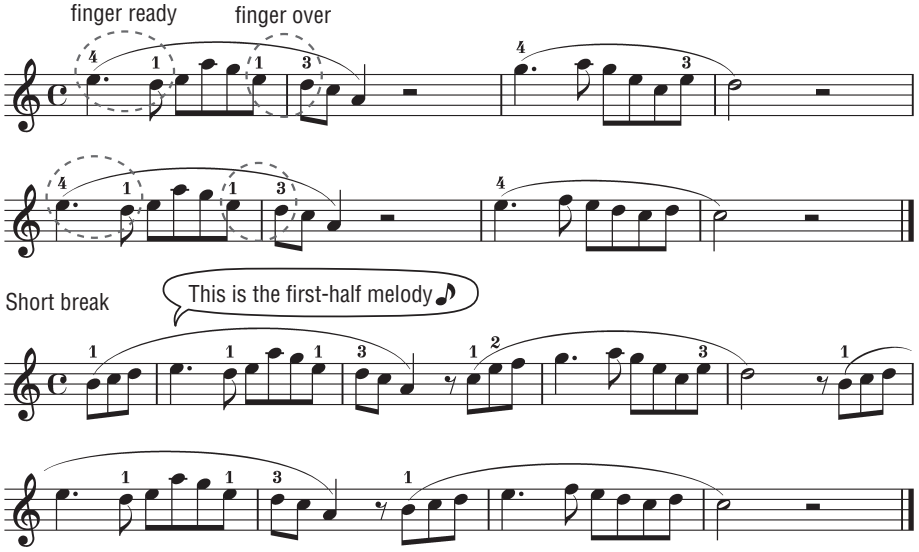
Step 01 The Melody Begins

The melody begins with an auftakt. The first note is played with finger 1, and should not be played too strongly.
Play a little stronger as the notes get higher to build up the mood.



Step 02 Diligent Practice Time

The "finger ready" and "finger over" (page 9) techniques are used here. Prepare for the next note a little early to make playing easier.
Don't rush the 8th notes. Take it slow and easy.

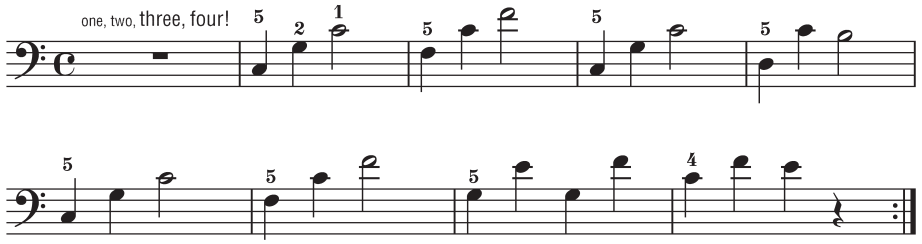


Step 03

Left hand

Diligent Practice Time

This is practice for the left-hand accompaniment for the first half.
Consider each measure as a group of notes. It will be easier to play if you keep the image of the keys you'll play in each group in your mind before playing the first note.

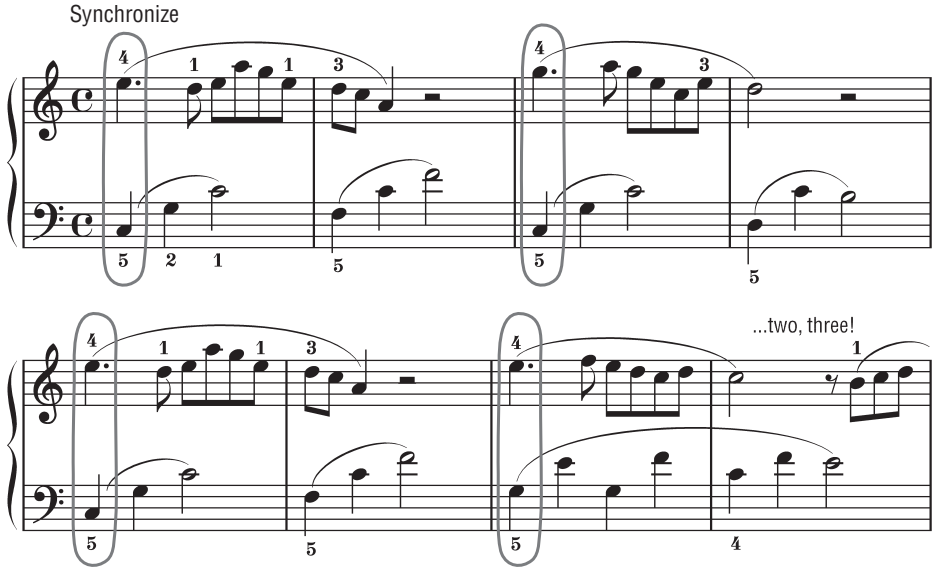


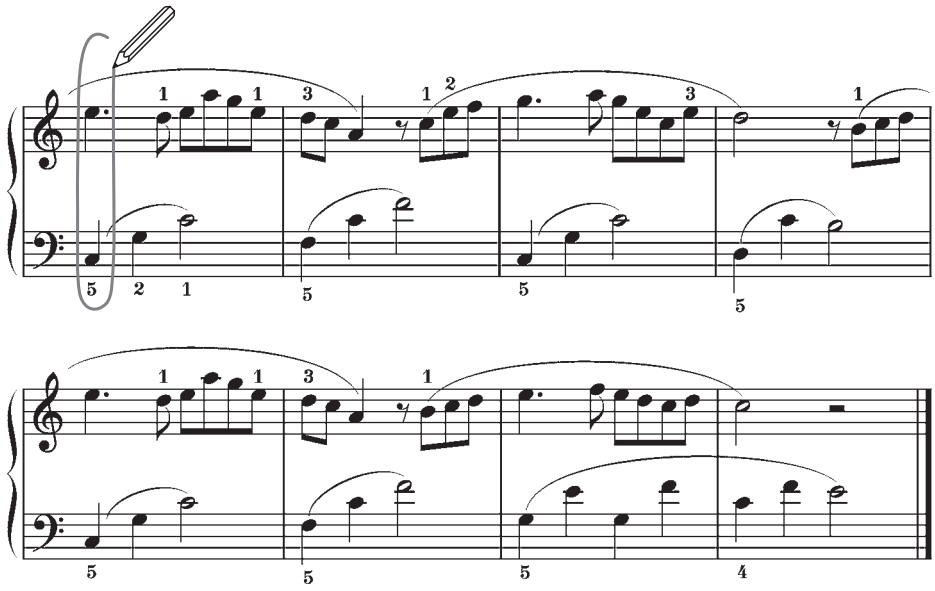
Step 04

Both hands

Play with Both Hands

It's time to play with the left and right hands together. Play the left-hand part carefully while listening to the metronome. That will allow you to play the right-hand part with a relaxed feel.





Step 05

Both hands

Special Practice: Rhythm Combinations - “Meet Marimba Man Jr.”

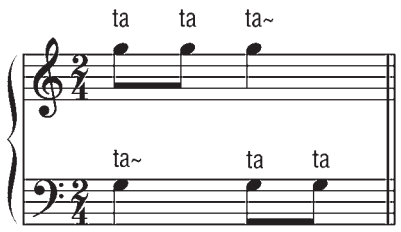
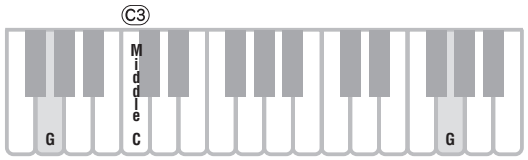
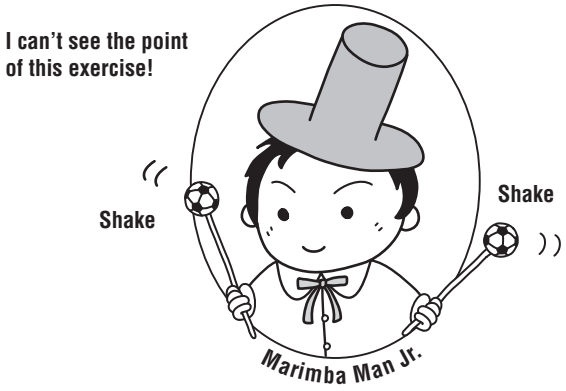
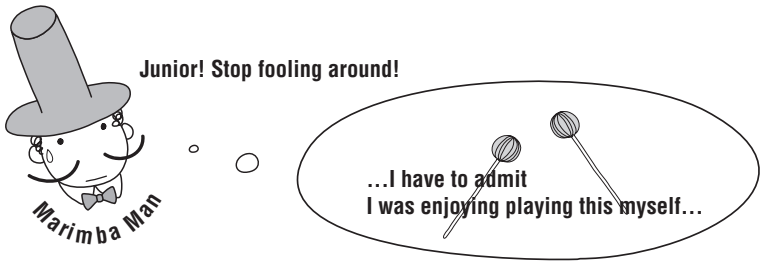
Play this a number of times after the lead-in. Have fun trying not to get pulled off time by the melody playing in the background.

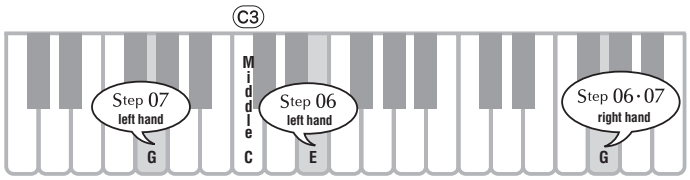








Steps 06 and 07 begin on these notes. Ready?

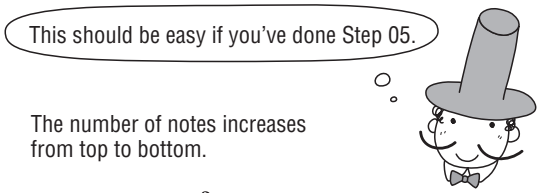


Step 06

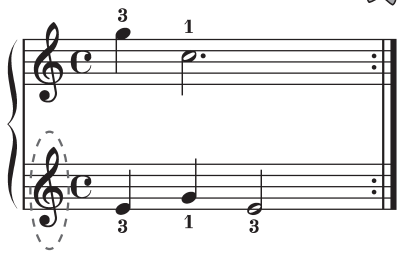
Both hands

Rhythm Combinations: Ex. 1

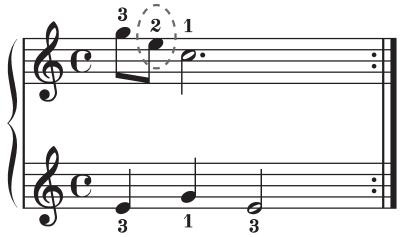
Try to connect the right and left hand eighth notes smoothly. Don't play the left hand finger 1 notes too loudly.

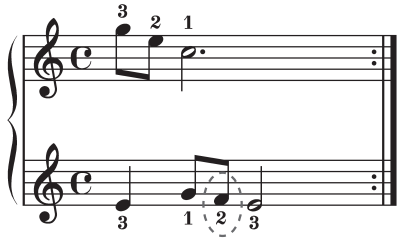


The number of notes increases from top to bottom.



Treble clef for the left hand too!



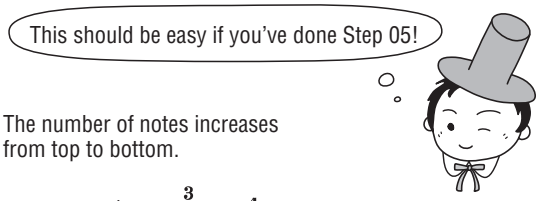


Step 07

Both hands

Rhythm Combinations: Ex. 2

The F♯ played by the left hand is a black key. Before playing the exercise, play the G, A, and F♯ keys together to get a feel for the finger positions.



The number of notes increases from top to bottom.

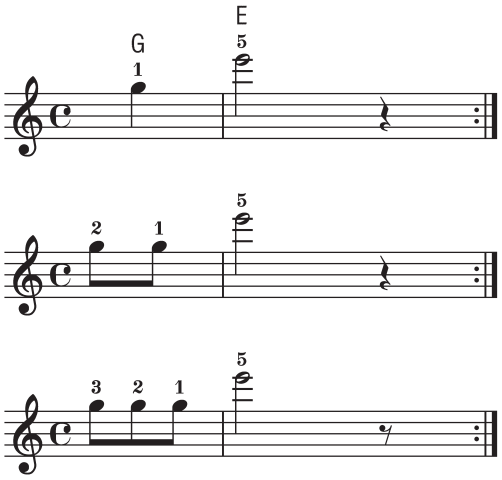
Step 08 Diligent Practice Time

Practice repeating the G note. You'll get a nice uniform sound even if you change fingers if you play in about the same position.



Step 09 Special Practice - "Finishing Up in Style"

The melody closes with a series of 8th notes.

Learn this section by dividing into to short segments that you can practice individually. When you're ready, play then entire section.

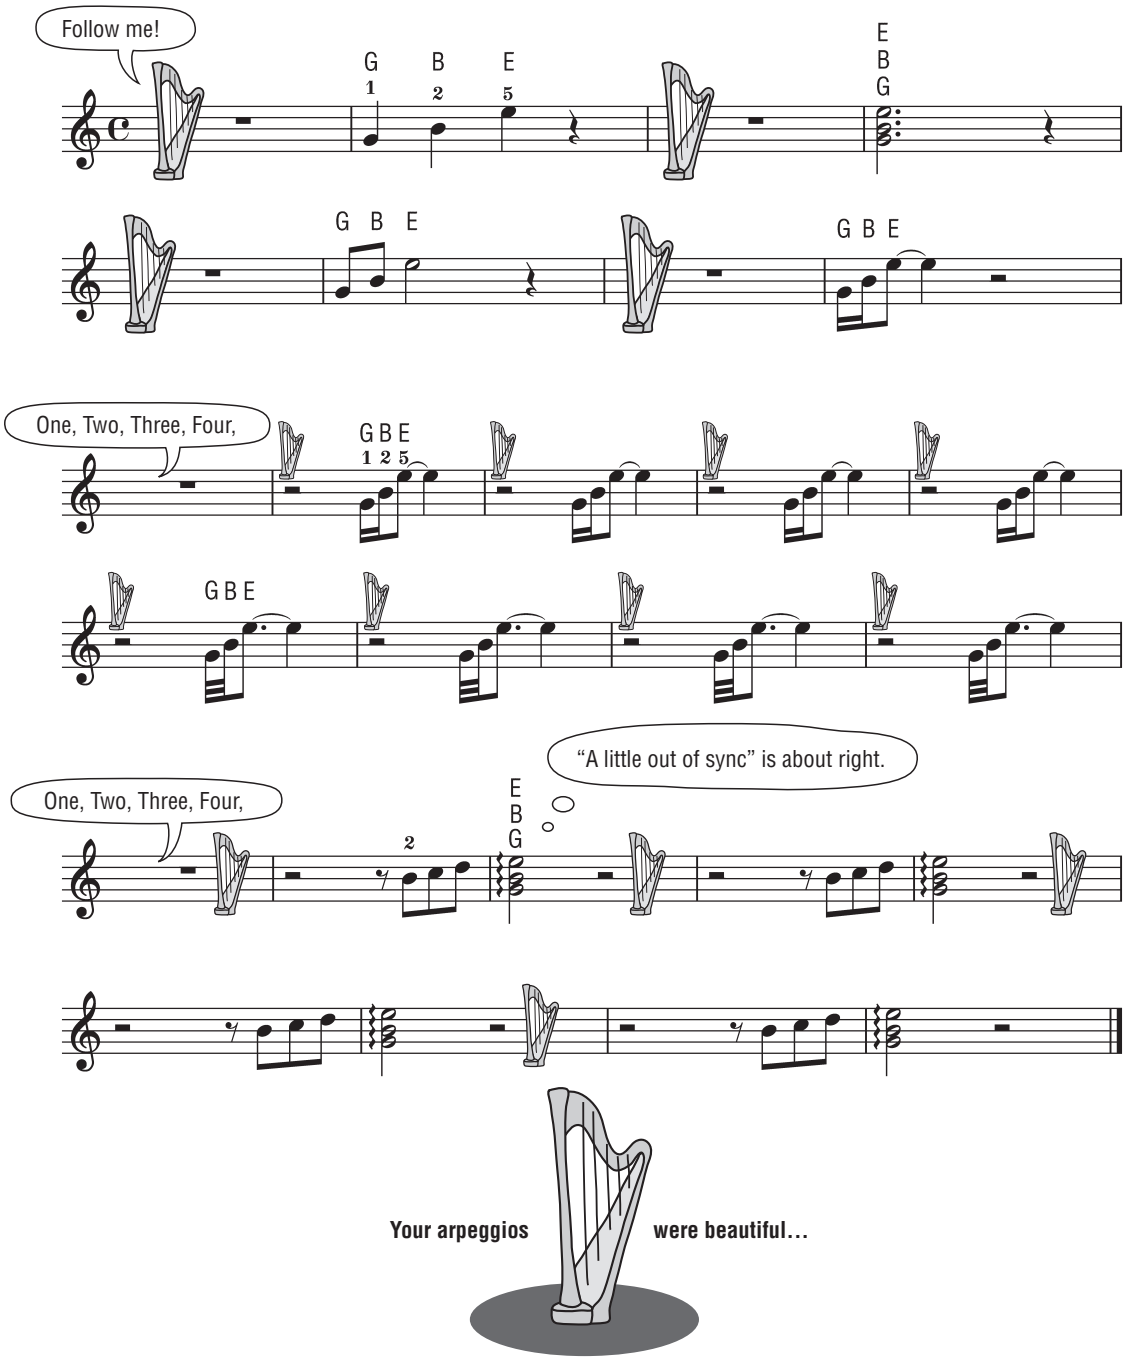
Step 01

Right hand

Special Practice: Arpeggio, R&B Version - “Follow the Harp!”

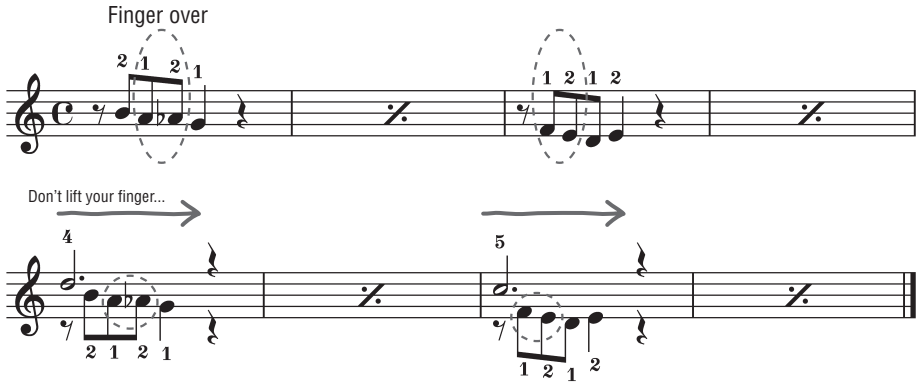
This is an arpeggio exercise. The G, B, and E notes will be played in a variety of ways. Listen to the rhythms the harp plays, then play them yourself.



Step 02 Diligent Practice Time

Right hand

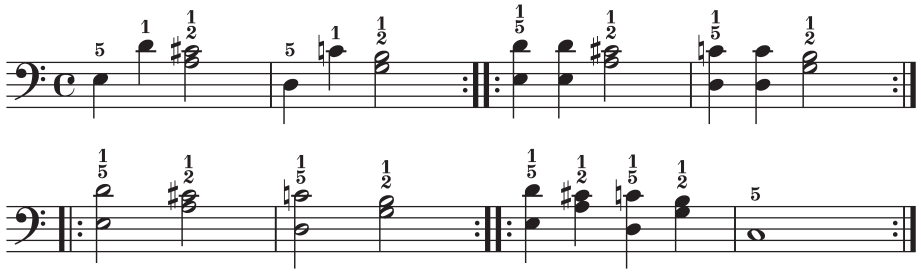
Let's practice the "finger over" (page 9) technique. It's easier if you bend your fingers slightly. The notes played with fingers 4 and 5 are the melody, so don't release them while you're playing the other notes.



Step 03 Special Practice - "Bossa Mood"

Left hand

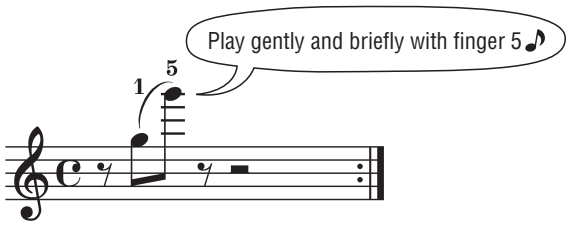
Let's do some left-hand practice with a lively Bossa Nova rhythm. This type of harmony appears frequently, so you should try to remember it.



Step 04 Diligent Practice Time

Right hand

Let's practice the accompanying line to the left-hand melody.
The French horn will start the melody. Listen carefully and learn the timing.

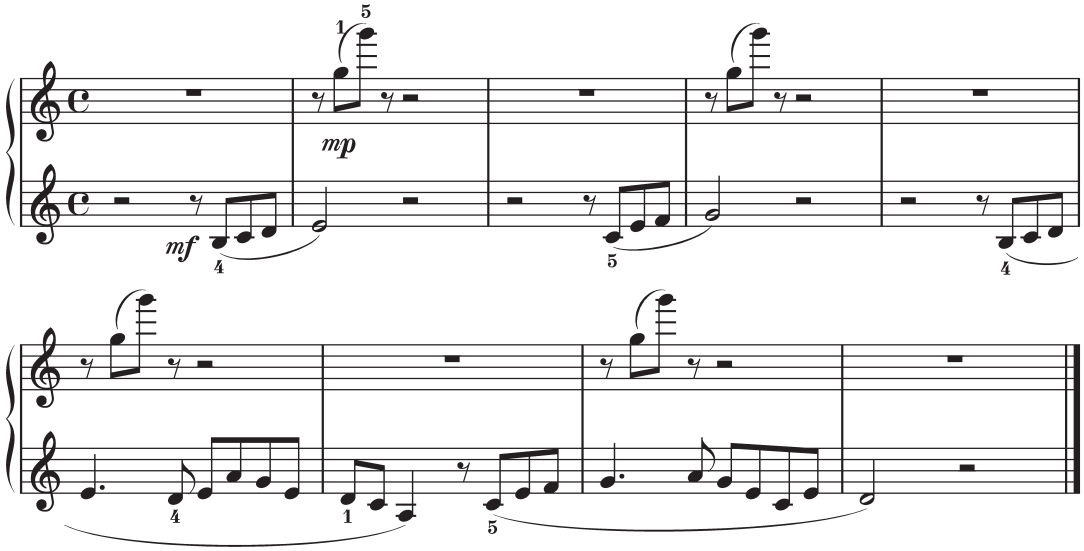


Step 05

Both hands

Diligent Practice Time

And now we'll play the left-hand melody and the accompanying right-hand notes together. Play the left-hand part moderately loud, and the right-hand part a little softer.



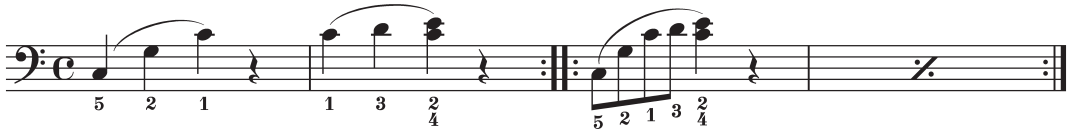
Step 06

Left hand

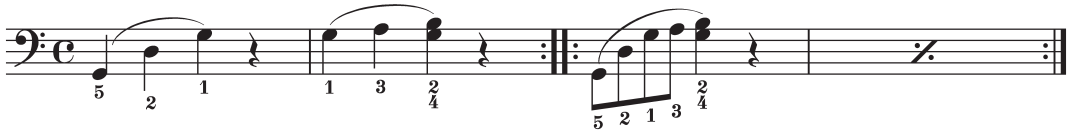
Diligent Practice Time

This type of left-hand accompaniment is often heard in piano pieces.

Keep your wrist relaxed and prepare early for the next note. Don't cut the last note of the phrase short.



Short break



Step 07

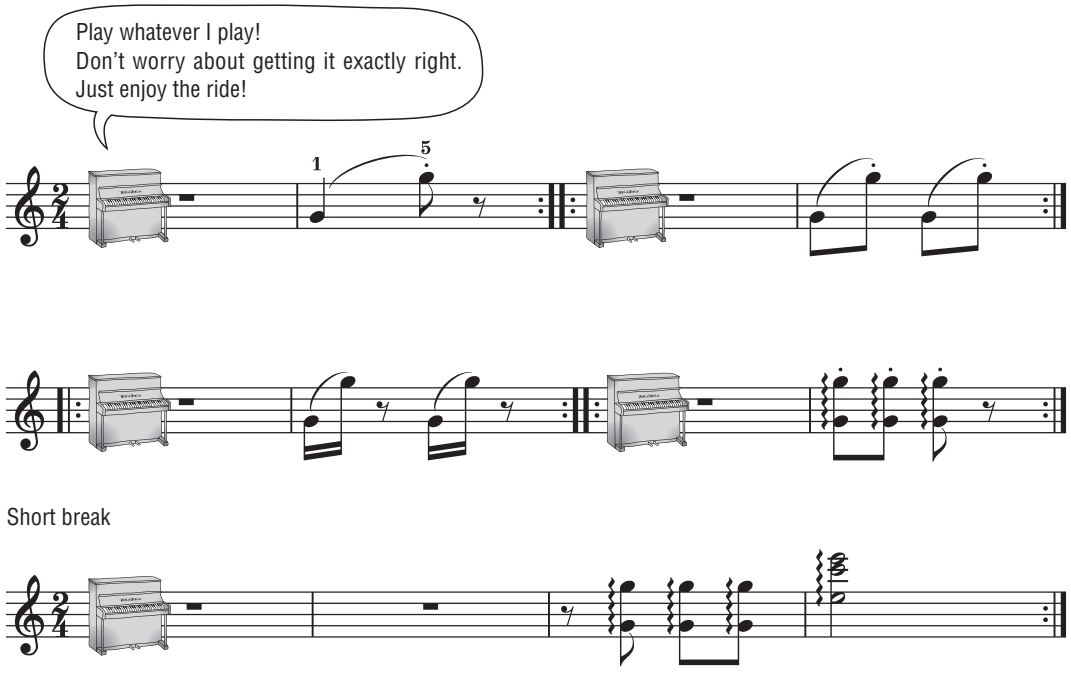
Right hand

Special Practice: Arpeggio, Ragtime Version - “Follow the Honky-Tonk Piano!”

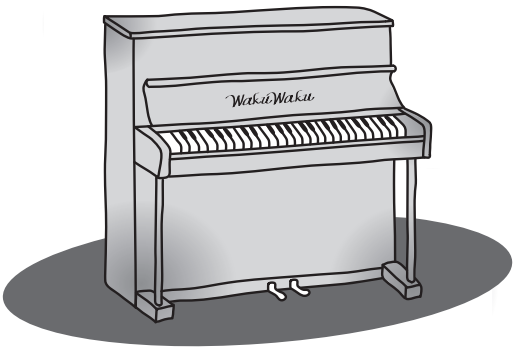
Welcome to the 1-octave arpeggio challenge!

Follow the honky-tonk piano, copying its nuances as closely as you can.

It doesn’t matter if you fall a bit behind the orchestra, but whatever you do don’t rush!



I’m what they call a “Honky-Tonk Piano”.
Like my unique sound?

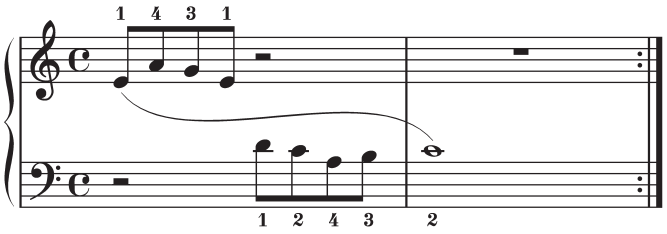


Step 08

Both hands

A Beautiful Ending

The right hand passes the melody line to the left hand, leading to a slow, serene ending. Enjoy the relaxed atmosphere of the orchestra too!



Step 09

Both hands

Play the Whole Song!

This is the finishing step!

Don't be afraid of making mistakes. Just concentrate on playing the entire song from start to finish.

Practice this with the lessons learned in each step in mind, and gradually you'll master the whole song.

The Last Rose of Summer

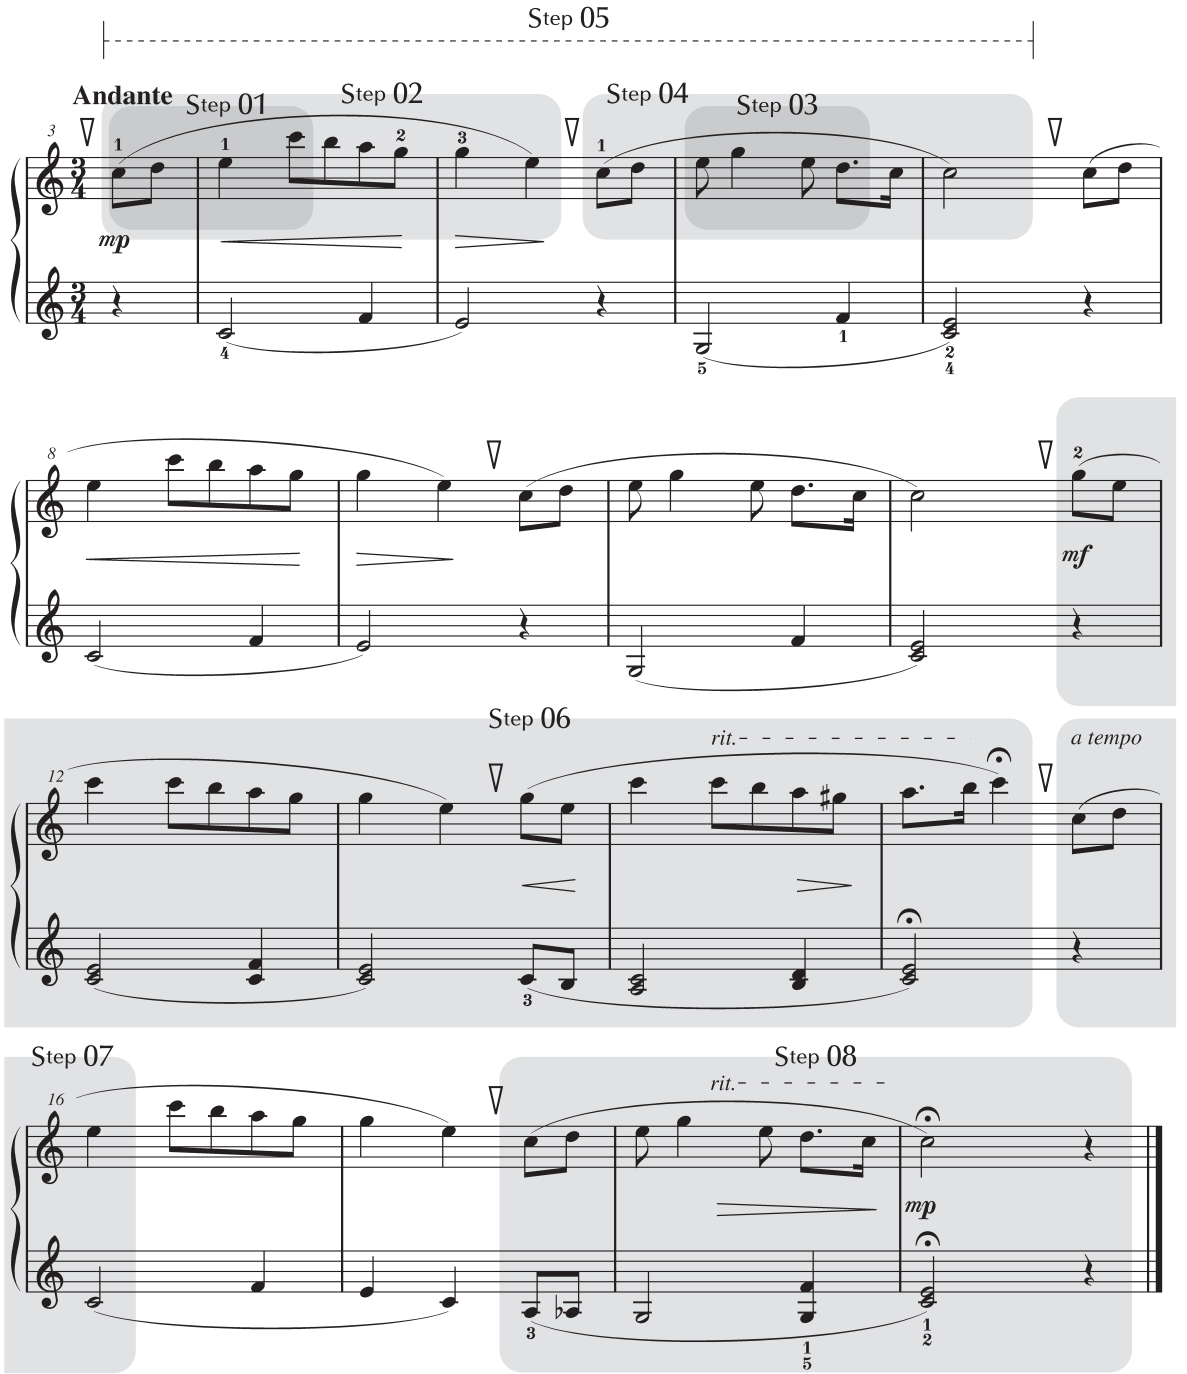
～With Step Map～

The melody for this song begins on an auftakt. The melody features repetitions and similar phrases, so if you can play the first 4 measures the rest will be easy. The left-hand rhythm in the first 2 measures repeats throughout the song. Match the feel of the left and right hands at the end of each phrase for a refined performance.

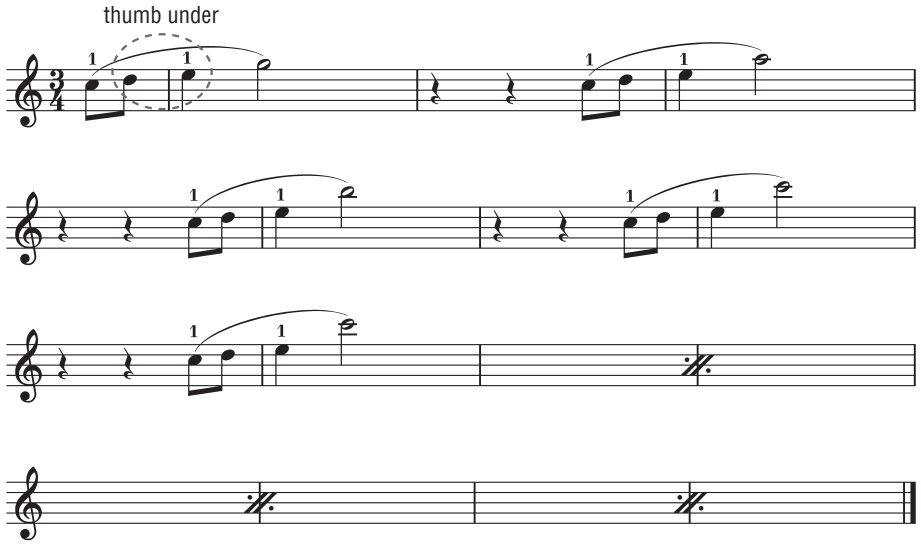


Step 01

Right hand

Warm-up Exercise - “Under and Stretch”

Auftakt and “finger under” (page 9) practice. Stretch your fingers a little more each time you play this exercise, while limbering up your mood as well.

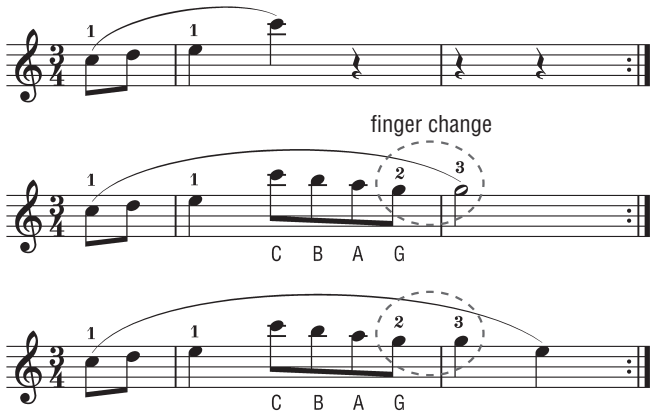


Step 02

Right hand

Diligent Practice Time

A phrase that uses “finger change” (page 9) fingering follows the Step 01 phrase, and the line becomes more melodic. Try not to become tense at the beginning, and start with a pure, sincere feel.
Stay calm, and don’t rush the C-B-A-G notes.



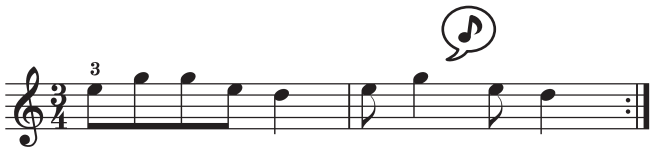
Step 03

Right hand

Syncopated Melody

Here we'll learn a syncopated section of the melody.

Try not to lift your fingers from the keyboard. Listen the glockenspiel in the backing orchestra, it will provide the timing guide you need.



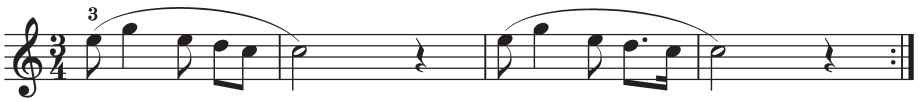
Step 04

Right hand

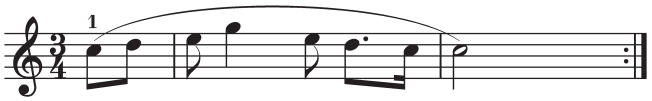
Diligent Practice Time

Here a dotted rhythm and auftakt are added to Step 03.

Play non-syncopated notes slightly softer to bring out the beauty of the melody.



one, two!



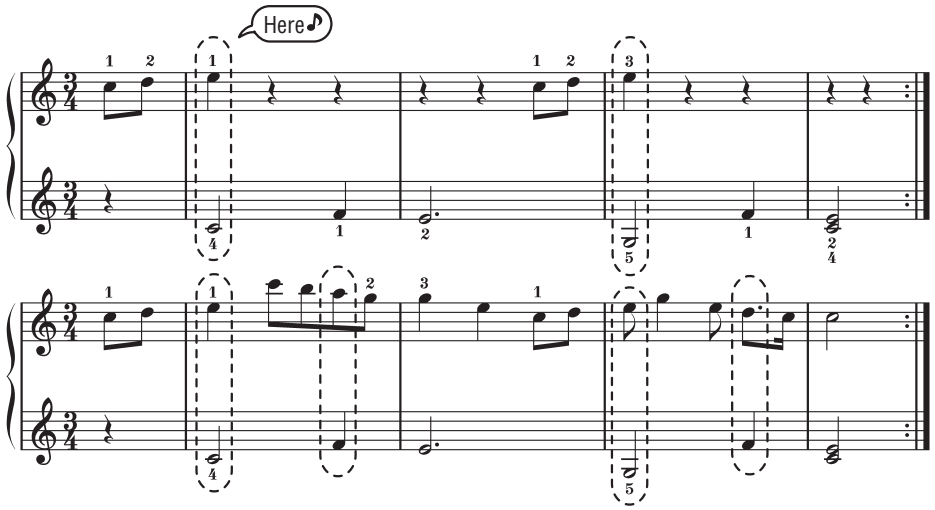
Step 05

Both hands

Timing Both Hands

Now we'll bring in the left hand for a two-handed performance. It's important to synchronize the left and right hands at the points marked (Here).

Play the ends of the phrases gently.



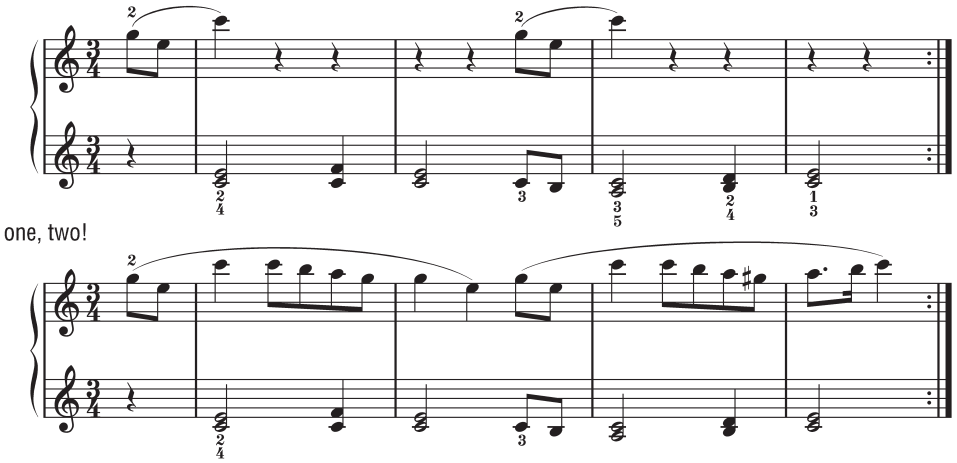
Step 06

Both hands

Diligent Practice Time

The way you hold your fingers is essential to playing the left-hand polyphony well. Don't hold your fingers straight. Keep them slightly bent.

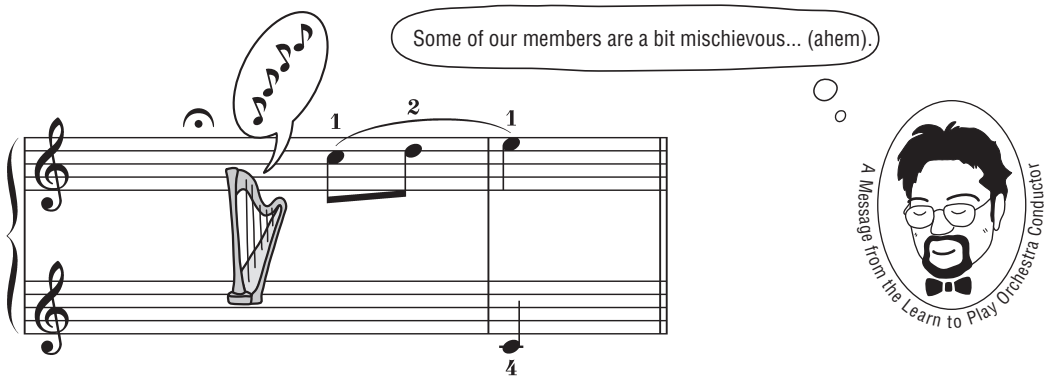
Keep the harmony notes synchronized so they sound as one.



Step 07 Special Practice - "Find a Cue!"

Both hands

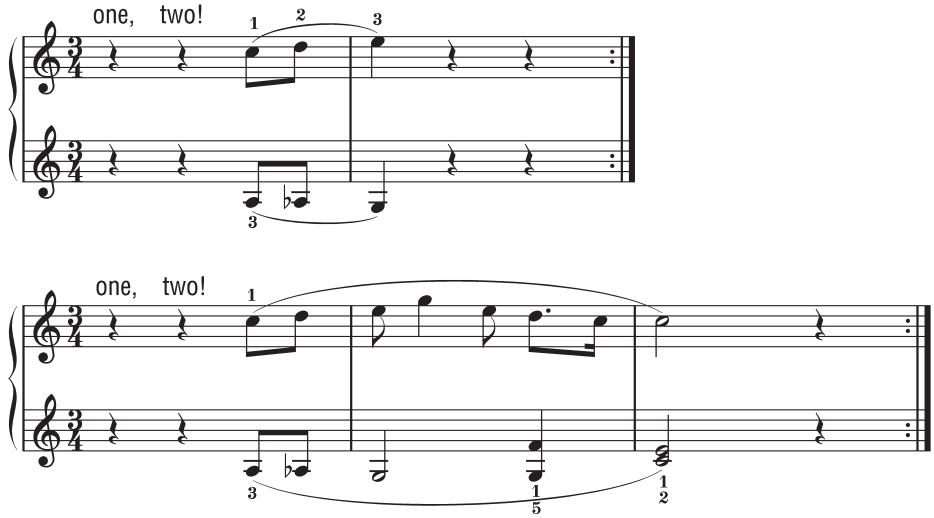
When playing with the Learn to Play Orchestra, listen to the harp for your cue to exit from the fermata 𝄐.
Practice listening for the right cue (!) so you can play in tight ensemble with the orchestra.



Step 08 Diligent Practice Time

Both hands

The left hand also plays a black key. This will go smoothly if you position your left hand a little toward the rear of the keyboard before playing the first A.



Step 09 Play the Whole Song!

Both hands

This is the finishing step!
Don't be afraid of making mistakes. Just concentrate on playing the entire song from start to finish.
Practice this with the lessons learned in each step in mind, and gradually you'll master the whole song.

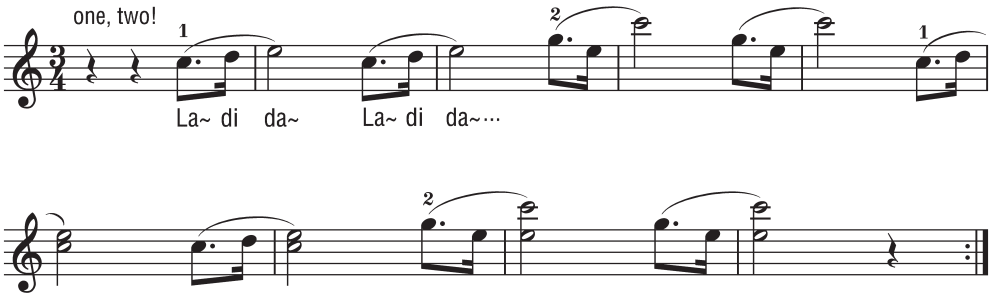
Right hand

Special Practice - “The Starting Rhythm”

This is a collection of auftakt melodies.

Try singing “La~di da~” while playing the dotted rhythms.



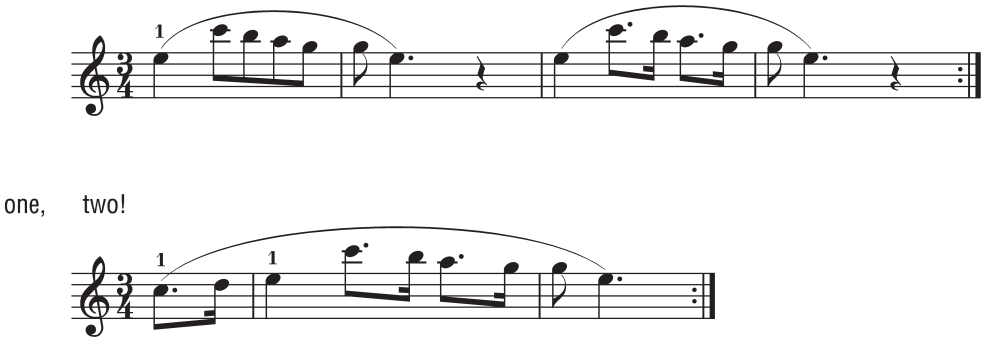
Step 02

Right hand

Diligent Practice Time

Play C-B-A-G beautifully, just softly touching the keys.

Play smoothly, without letting the notes cut off too soon.



Step 03

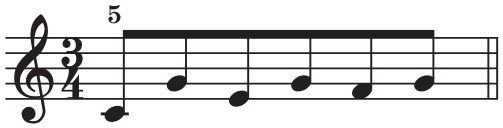
Left hand

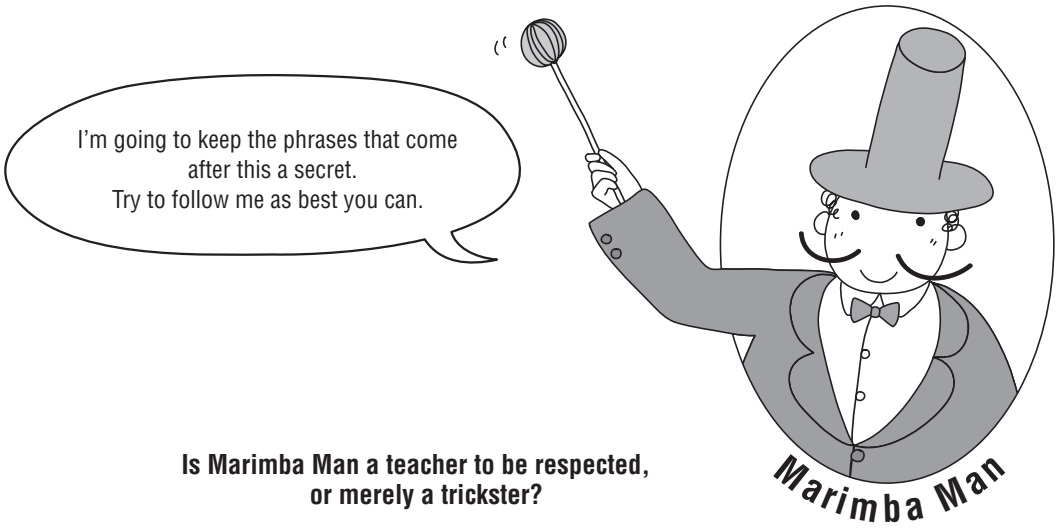
Special Practice - “Meet Marimba Man: Follow Me!”

Let’s practice the basic left-hand accompaniment pattern.

When you hear the rhythm, follow Marimba Man and copy each phrase he plays.

There will be a number of variations, so listen carefully.





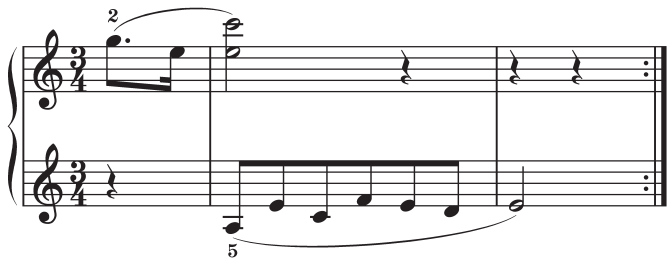
**Is Marimba Man a teacher to be respected,
or merely a trickster?**

Step 04

Both hands

Diligent Practice Time

Don’t play too heavily with the right hand. And try to keep the volume of the left-hand 8th notes consistent.

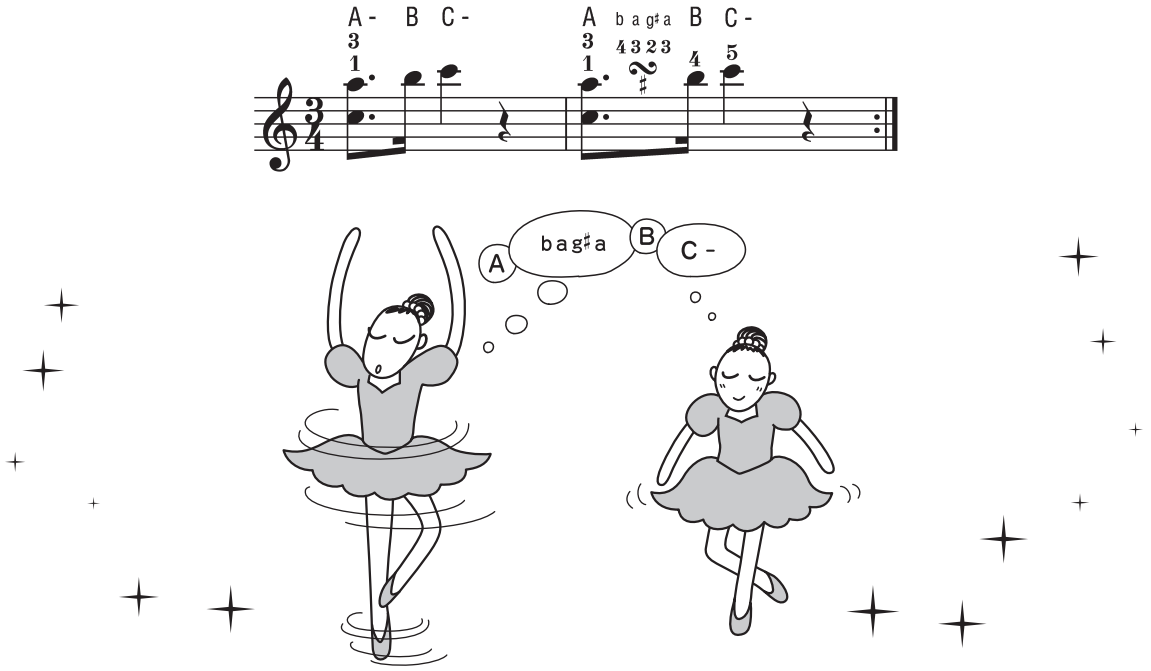


Step 05

Right hand

Turn Practice

Next we'll practice an ornamental turn. The melody line consists only of A, B, and C. The key is to bend your fingers slightly and play near the rear of the keyboard.
Don't rush. Play each end every note as distinctly as you can.



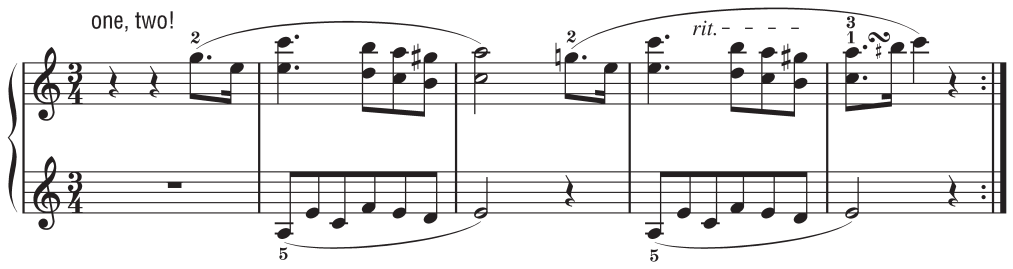
Conceptually, a turn might look something like this.

Step 06

Both hands

Diligent Practice Time

Match the left-hand line to the right-hand line as closely as possible.
When both hands are playing 8th notes, synchronize the timing carefully. If you hear beautiful harmony you're getting it right!

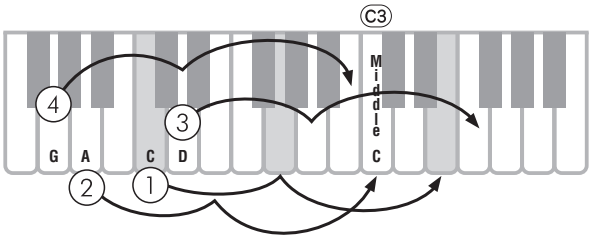


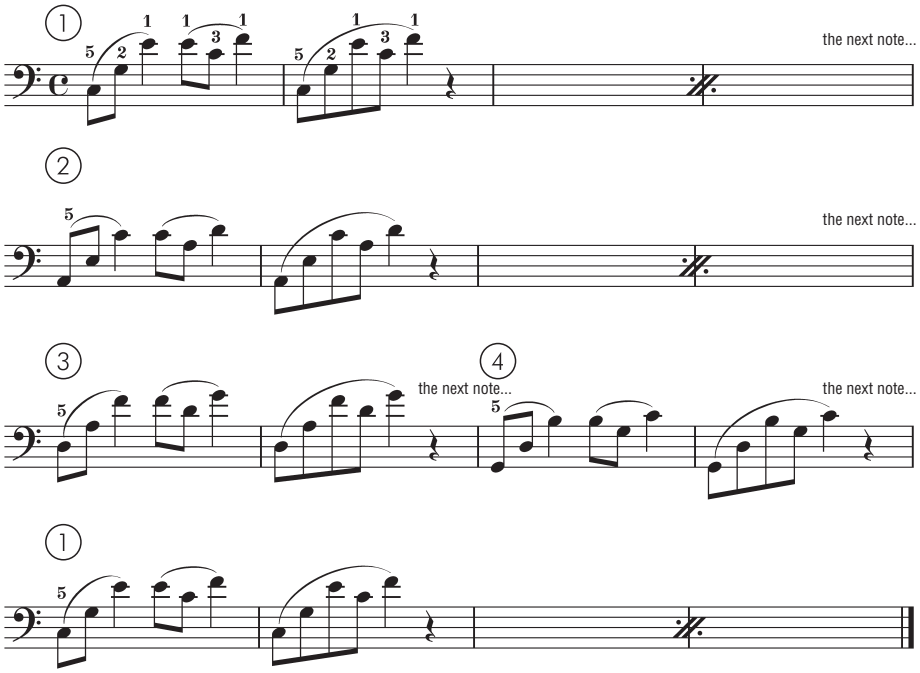
Step 07

Left hand

Special Practice - “Repeating Shapes”

Compared to the first half, the range of notes used in the second half accompaniment is wider. The notes played by finger 5 will change, but let’s make it so that the same shape repeats no matter where you start.
Prepare for the next note as early as possible.



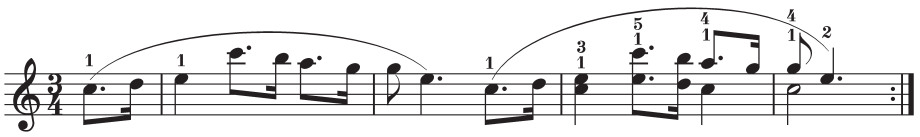


Step 08

Right hand

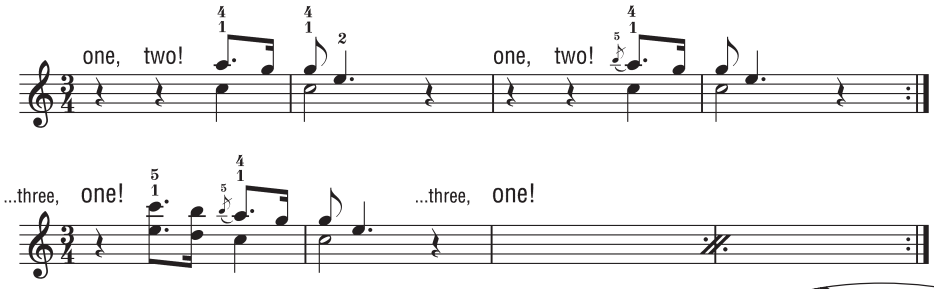
Diligent Practice Time

Keep playing smoothly during the polyphonic section.



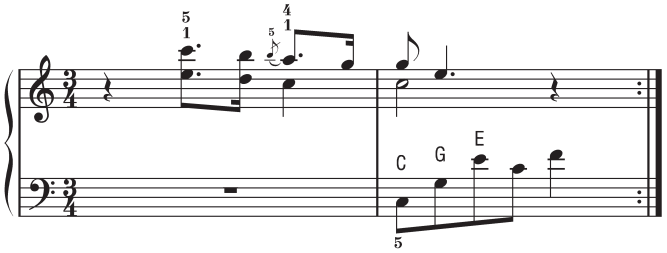
Step 09 Diligent Practice Time

This exercise includes grace notes, dotted rhythms, and polyphony.
Listen to the orchestra carefully, and play while singing the melody.



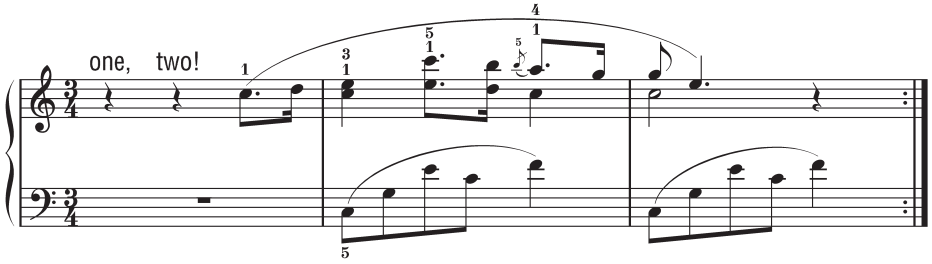
Step 10 Diligent Practice Time

Synchronize both hands from the first left-hand note. The left-hand line will go smoothly if you start with your fingers spread as if to play C, G, and E all at once.



Step 11 One More Diligent Practice Session

The right hand phrase should be played without hesitation.
The second left-hand C-G-E-C-F should also be begun at a leisurely pace.



Step 12 Play the Whole Song!

This is the finishing step!
Don't be afraid of making mistakes. Just concentrate on playing the entire song from start to finish.
Practice this with the lessons learned in each step in mind, and gradually you'll master the whole song.

Amazing Grace

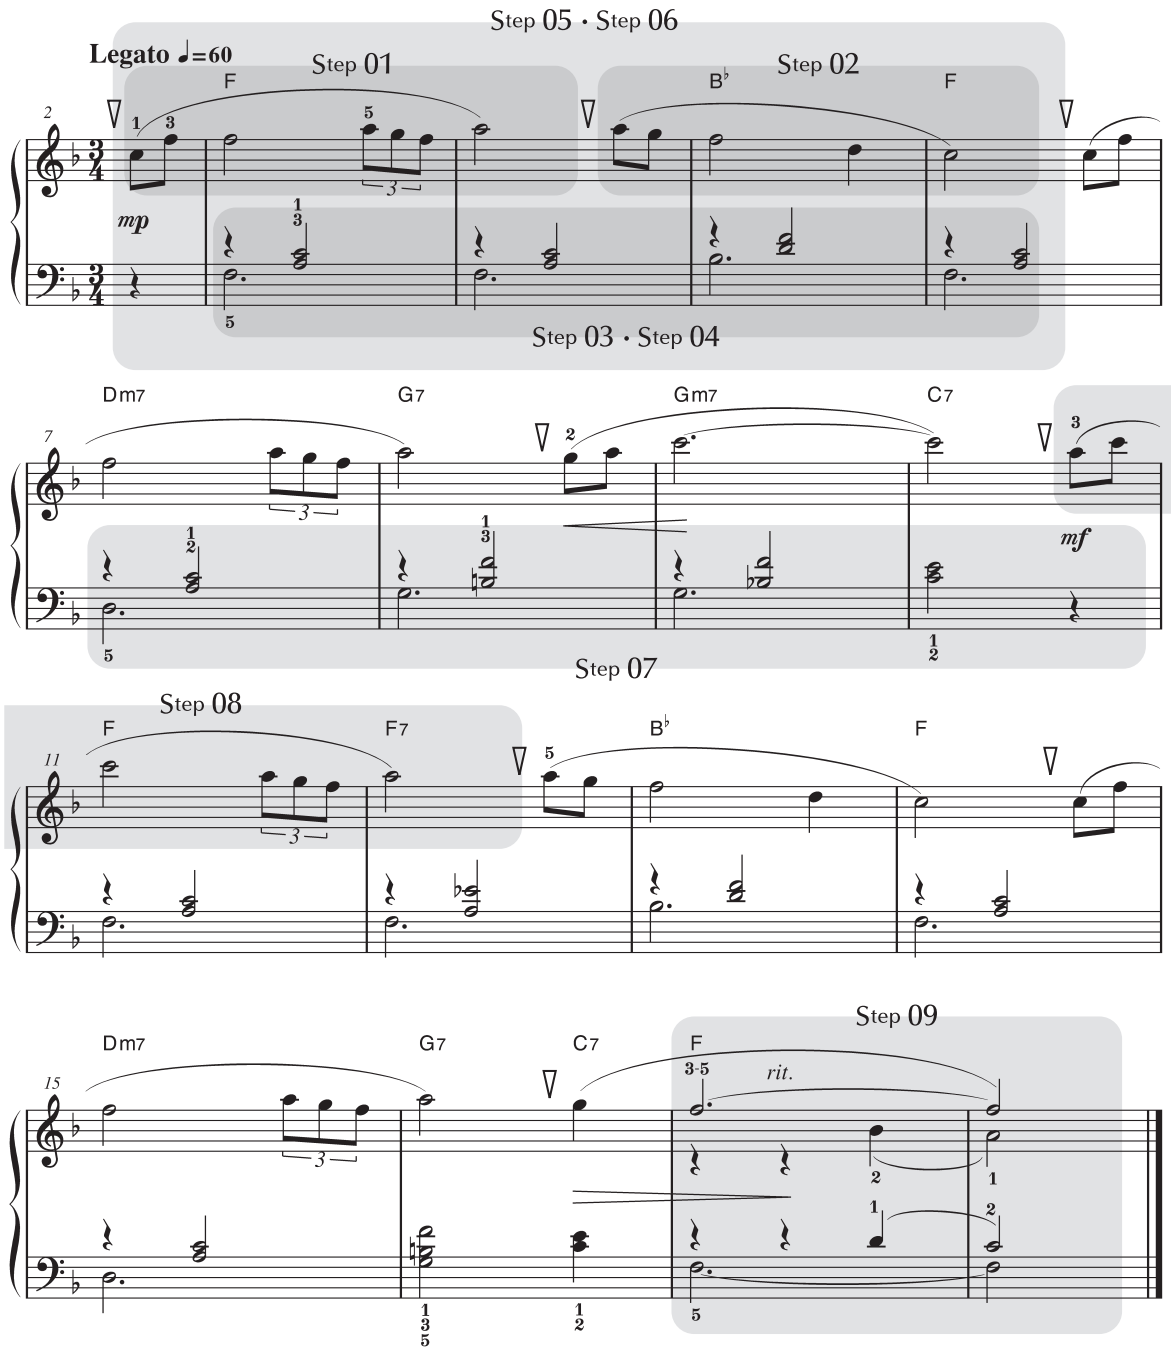
～With Step Map～

The melody includes triplets, so stay calm and play them without rushing. The left hand holds the bass notes on the first beat. Get comfortable, relax, and start practicing!

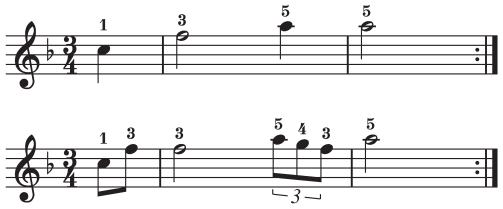


Step 01

Right hand

The Opening Melody

Once you've learned the overall flow, try playing the melody while following the finger numbers.

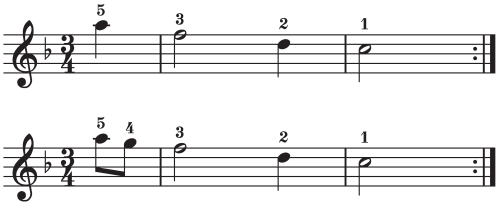


Step 02

Right hand

The Second Melody

The same applies here. Grasp the overall flow then fill in the blanks.

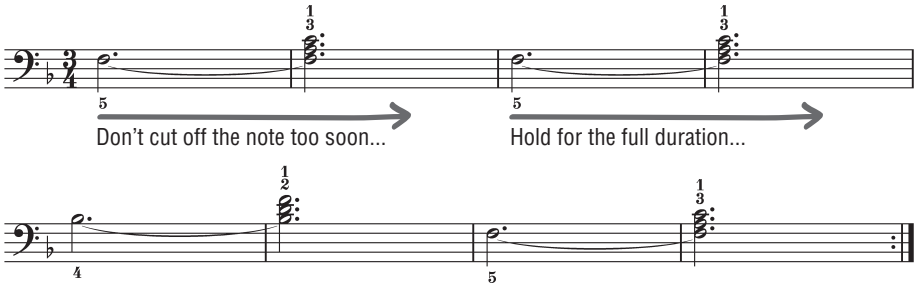


Step 03 Warm-up Exercise - "The Chinese Princess"

Left hand

It's time to warm up the left hand!

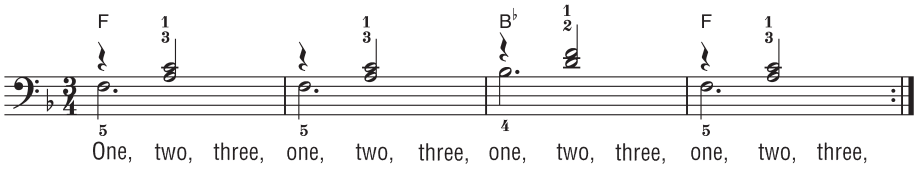
Be sure to hold the bottom bass notes for their full duration.



Step 04 Diligent Practice Time

Left hand

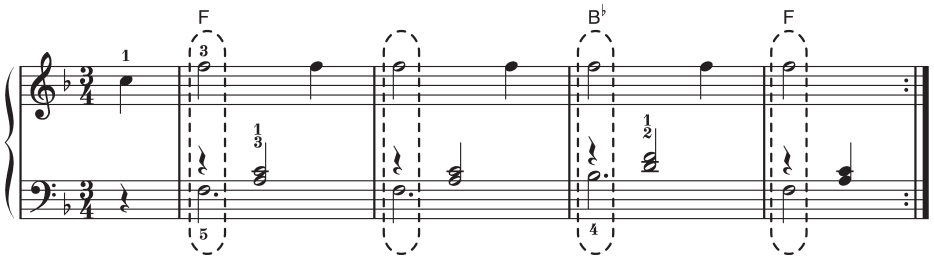
Put the warm-up exercise to use and try this. Counting "one, two, three" out loud while playing will make it easier to learn the rhythm.



Step 05 Warm-up Exercise - "Left and Right in Sync"

Both hands

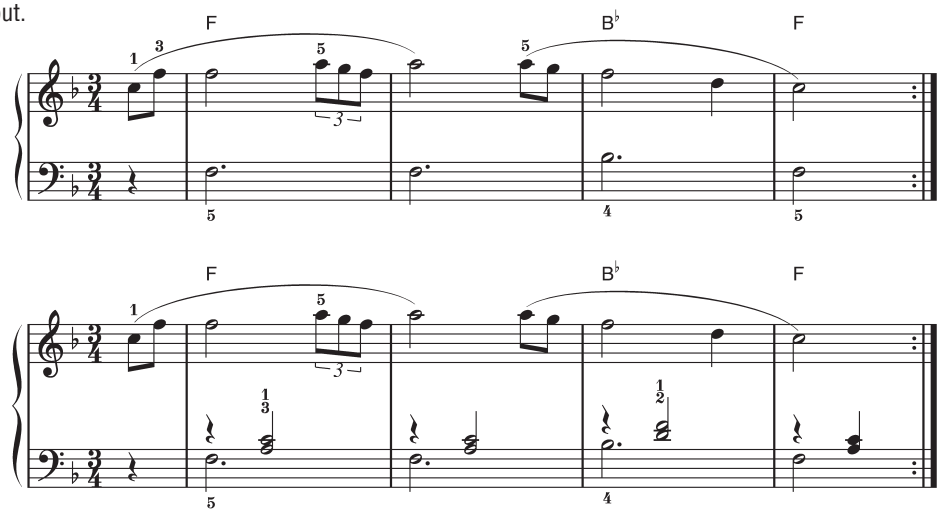
This exercise will help you to synchronize the left and right hands. First, concentrate on synchronizing the first beat in each measure.



Step 06 Diligent Practice Time

Both hands

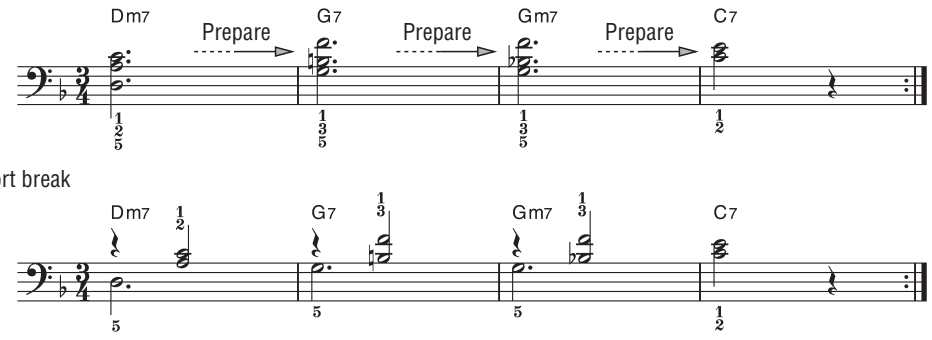
Here we'll play a left-hand bass line along with the right-hand melody. The left-hand part changes to the actual accompaniment pattern in the second half. Carefully match the timing of the notes on the first beat of each measure throughout.



Step 07 "Before a Chord Change"

Left hand

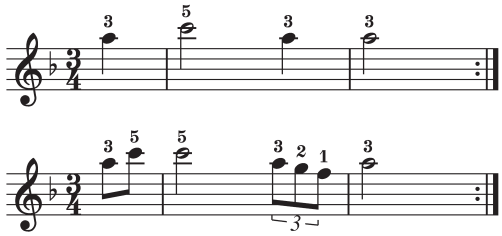
Prepare to play the next chord ahead of time.



Step 08 Diligent Practice Time

Right hand

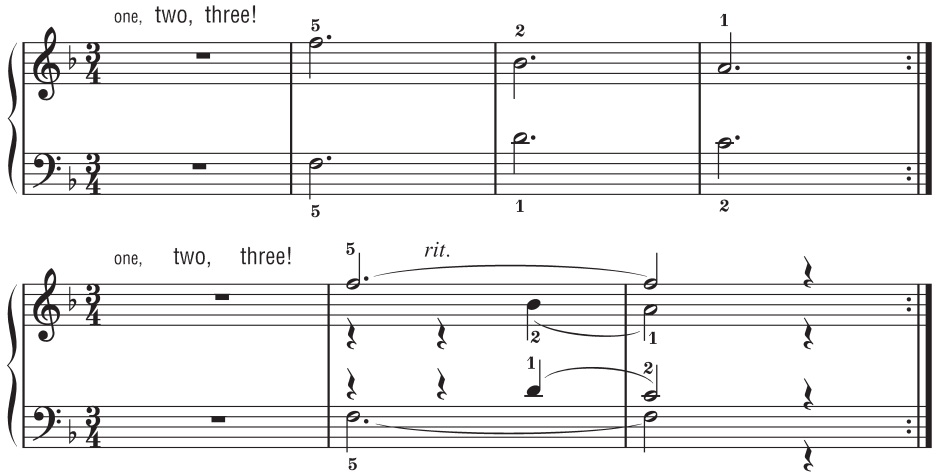
This is the last right-hand practice step. Start with the overall flow then fill in the blanks.



Step 09 "A Serene Ending"

Both hands

This is the song's ending. First check the finger numbers and the notes they play. The rhythm changes towards the end.



Step 10 Play the Whole Song!

Both hands

This is the finishing step!

Don't be afraid of making mistakes. Just concentrate on playing the entire song from start to finish.

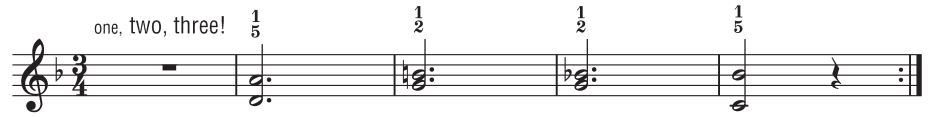
Step 02 Diligent Practice Time

Left hand

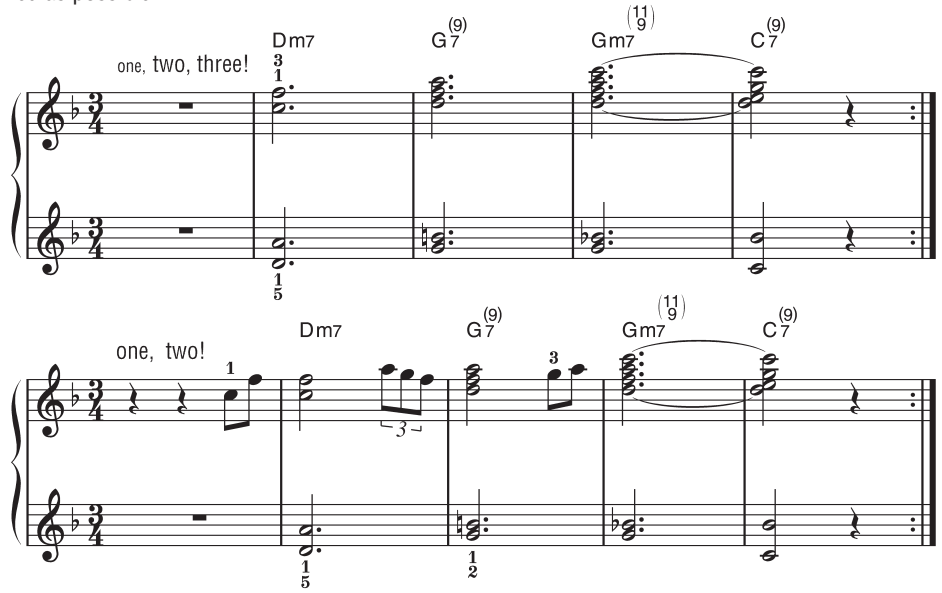
Next try out the left-hand notes.



Step 03 Diligent Practice Time

Both hands

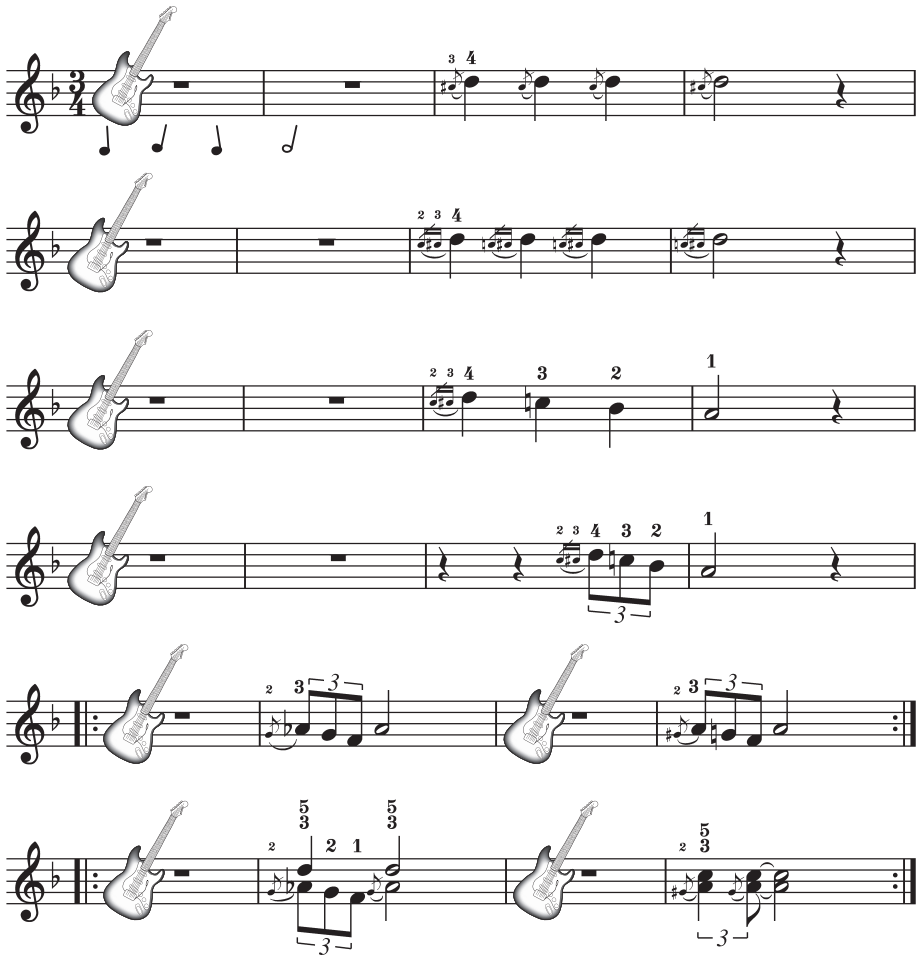
And finally, we're ready to play with both hands. Make the chord changes in each measure as smooth and synchronized as possible.

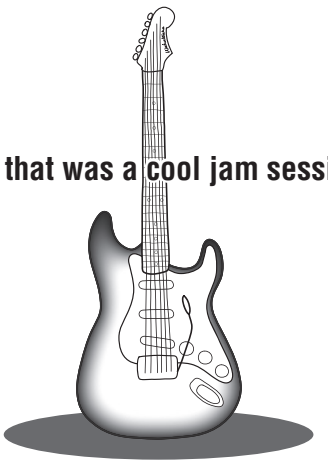


Step 04 Special Practice: Grace Notes - “Follow the Guitarist!”

Right hand

And now for some special grace note training. Copy whatever the guitarist plays.



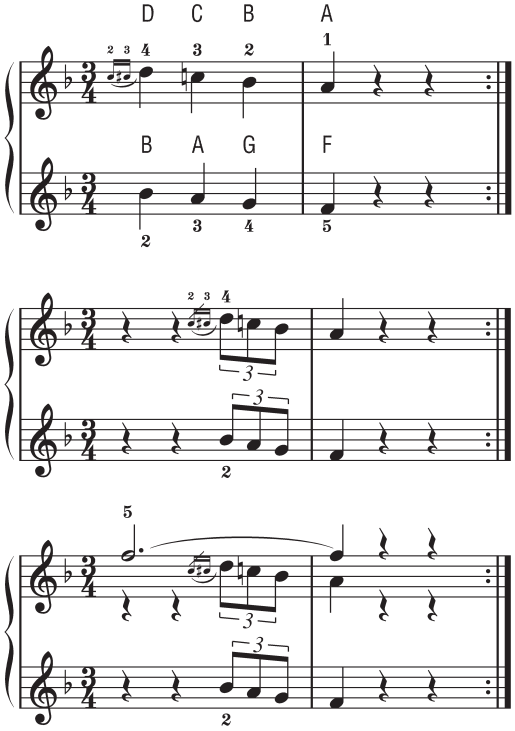


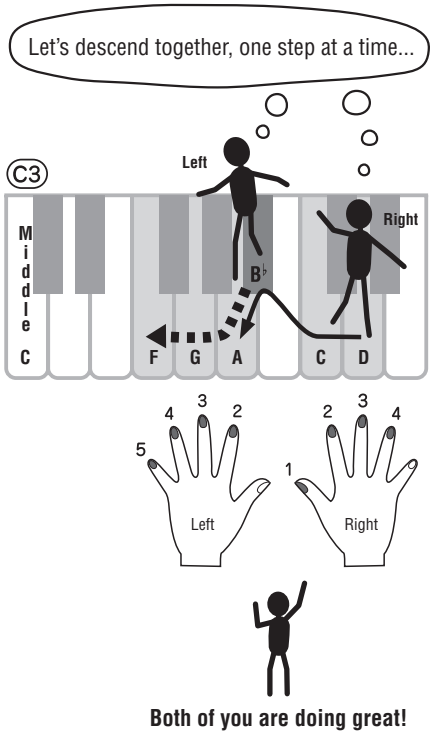
Now that was a cool jam session!

Step 05 Diligent Practice Time

Both hands

Note that the left-hand and right-hand lines move in parallel. Play so that the descent to each successive note is clear.

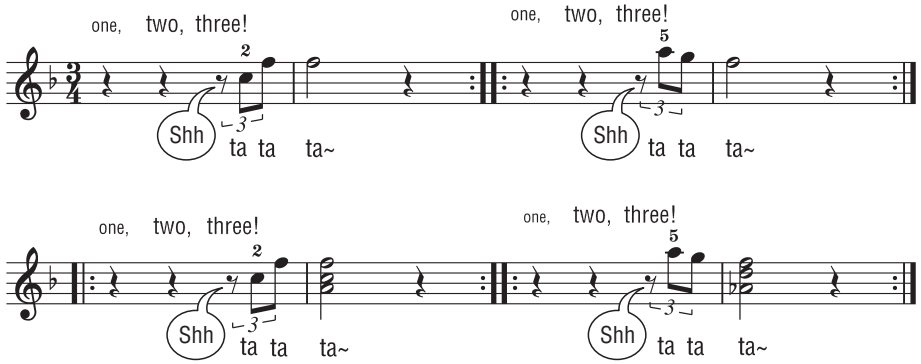




Step 06 "Shh, ta ta ta~"

Right hand

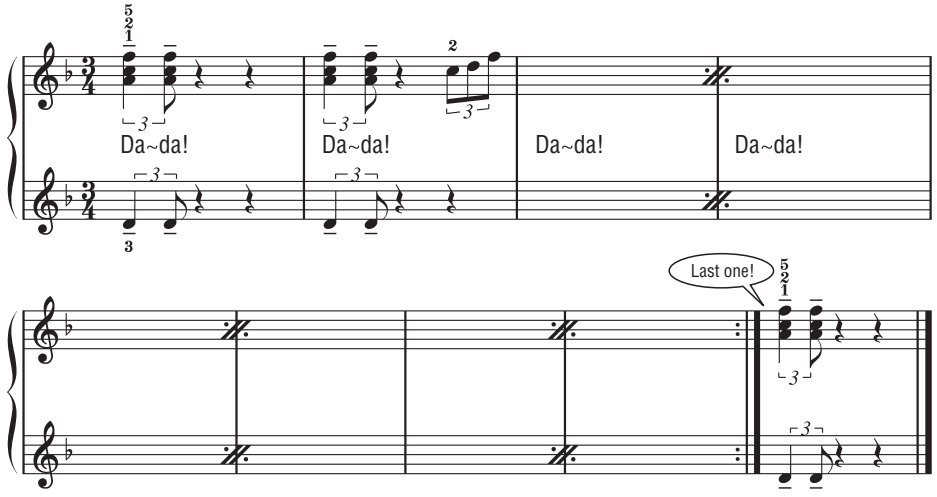
Listen for the drum cue and play "shh, ta ta ta~". Of course you won't actually play or hear "shh" (it's a rest), but you should be able to feel it.



Step 07 "Triplets!"

Both hands

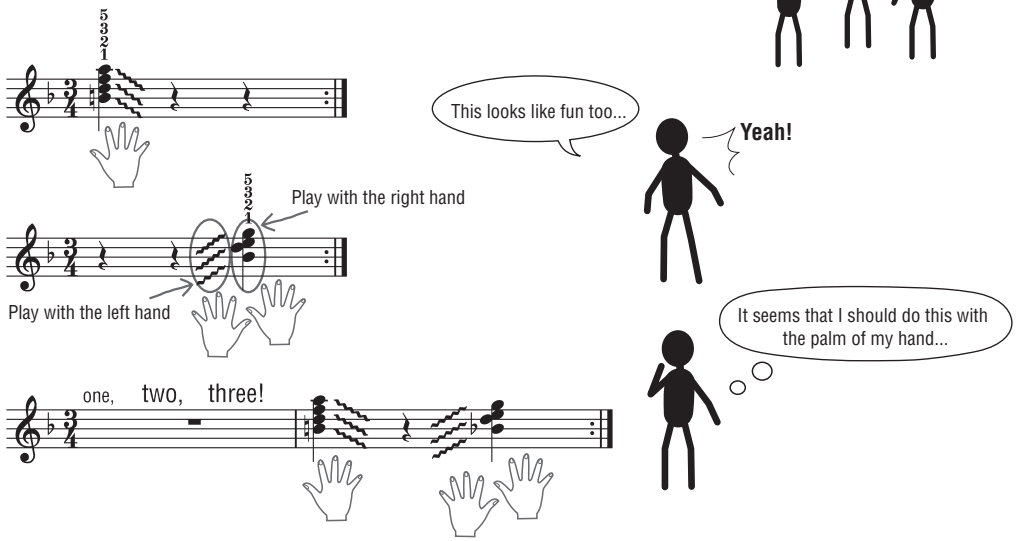
Play this tightly with the band and you'll really impress the crowd. Play with a moderately heavy touch, and try saying "da~ da!" while playing the triplets.

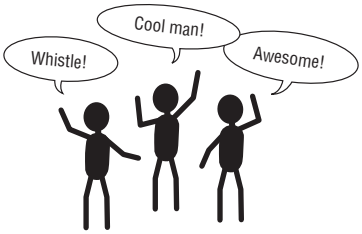


Step 08 "Glissandos Everywhere"

Both hands

Glissandos can be fun too! Let's learn their timing. Try to keep the intervals clean.





Step 09 Play the Whole Song!

Both hands

This is the finishing step!

Don't be afraid of making mistakes. Just concentrate on playing the entire song from start to finish.

Practice this with the lessons learned in each step in mind, and gradually you'll master the whole song.

Touch Tutor

Musical expression is the result of an effective use of dynamics, tempo, and phrasing. In this category, how hard or soft you play the keys is referred to as “Touch” and can be used to express dynamics.
Using “Touch” freely widens the power of expression in your playing. Give it a try.

* Refer the strength level displayed in the LCD and use “touch”.
To play with the same voice that is used in the performance data, select voice number “000” (Song OTS Mode).

● What are Chords?

A chord is a group of notes, usually three or more, that produce harmony when sounded together. Developing an understanding of chords lets you play a wider variety of songs on instruments equipped with the style function.

● Lets Try Some Chords

Rather than try to explain how chords work, its better to have an understanding of what the different chords sound like. Chord studies 01–07 show how to finger some of the more common chord types and give you a chance to hear what they sound like. Chord studies 08–12 show how to play some basic chord progressions. The more you play through the progressions the smoother your playing will get, so repeat often.

● How Did You Do?

We hope you found these chords and chord progressions interesting. Take this opportunity to play a variety of chords and hear what they sound like.

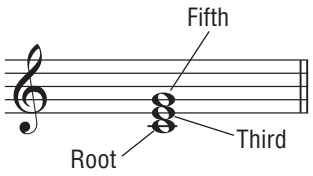
Chord Progression

The chords that were introduced in the “Chord Study” category can be combined in a series to create a song. This series of chords is called a chord progression.

Musical styles all have their own standard chord progressions, but first let’s try playing some basic chords.



Notes can be combined in a number of different ways to make chords, but the most basic combination is three notes stacked in thirds forming a triad. Stacking notes on top of the root makes a chord based on the root note.

Stacking three notes separated by thirds is called a triad.

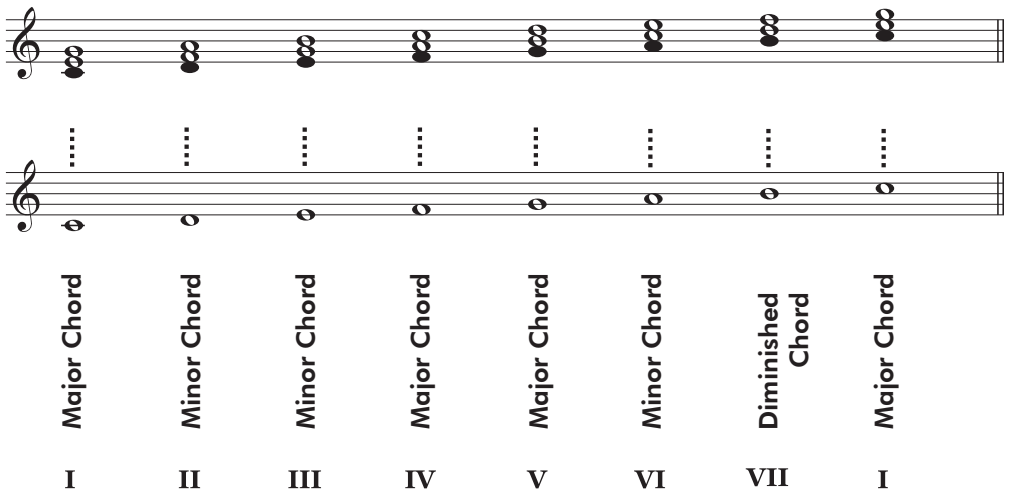
The tones are named **“root”** upon which the chord is based, **“third”** which is a third above the root, and **“fifth”** which is another third up.

Use the Chord Progression Category to gain experience using chords. The root is marked as “ ● ” for easy reference.

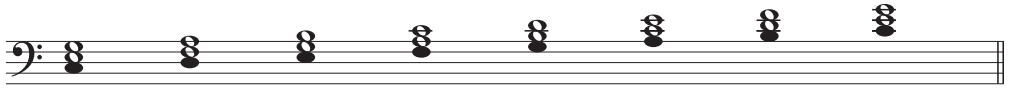
Diatonic Triads of a C Major Scale

Let’s see how this works using a C major scale.

Using each note of the C scale as a root, two notes are stacked vertically onto each root to form the corresponding chord. These chords are marked with Roman numerals to indicate the scale degree on which each chord is built. So starting with C, it is labeled as I for the 1st degree, D is labeled II for the 2nd degree, E is III for the 3rd degree and so on up to B which is labeled VII for the 7th degree.



* The same chords are shown in the bass clef below.



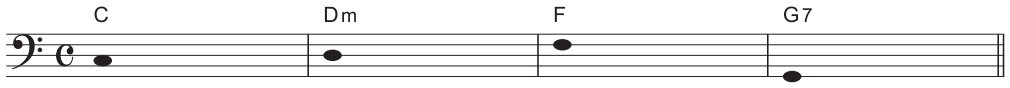
* “Maj1245” that appears in the LCD indicates Maj=Major and 1245= I, II, IV, V. min = minor.

* Due to the instrument’s limitations, some chord names are displayed by their enharmonic chord name.
ex. Score “D♭” → displayed “C♯”

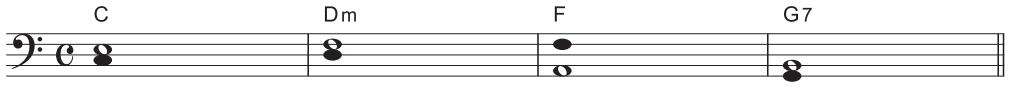
Basic Rules

Song #126 example:

• 1Note: Play the root note of the chord



• 2Notes: Play the root + the 3rd interval



• 3Notes: Play the root + the 3rd + the 5th interval

• ALL: Play all the notes that make up the chord.

Because notes played outside of the keyboard's default chord detection range are not detected, chord inversions are used. You can make a chord inversion by changing the order in which the notes of a chord are stacked.
Press the [PHRASE REPEAT] button and, if nothing has been previously set, "C 1Note" is shown in the LCD. Press the [PLAY] button and each note in the "1Note" score above plays twice, after which the entire exercise repeats.
With the song stopped, press the [+,-] button to select "1Note, 2Notes, 3Notes, ALL" to set how you want to play the chords.
Let's start with the "1Note" setting and use only the root notes. Once you get accustomed to playing the root, it's a good idea to increase the number of notes you need to play by choosing "2Notes, 3Notes..."

* You can set the key for each song. If the setting is not changed, the default key is C for major songs and A minor for minor songs.
* The chord progression score is only available with the "ALL" setting.

Knowing how to play chords makes playing the instrument that much more enjoyable.
Chord playing skills can also help you widen your musical repertoire with commercial sheet music or scores found in the keyboard's "Favorite with Style" categories. Use the Style (Auto Accompaniment) function to play chords with your left hand and the melody with your right hand.
