

Previous MGP32X, MGP24X firmware version information

V1.01

New Features

- The unit can now relay information about elapsed recording time and remaining recording time to the MGP Editor app.
- Added a confirmation procedure when changing the recording format.
- Changed the initial values of user programs (UserPreset 1, UserPreset 2, UserPreset 3) for COMP (compressor) to MultiBand Comp variations.

This change will be reflected after resetting the user memory.
